

Vice President **Al Gore** is a politician, who has made a lot of money, quoting things he read about, or whatever some scientists have said! Unfortunately, when the scientist quoted, or the data developed, is in error, then he, the **(V.P.)** is left with egg on HIS face. It only points out HIS **(VP)** ignorance, of Science.

Another **BAD one Mr. Gore** unfortunately said, was that the temperature at the center of the earth (core), is "**millions of degrees**". In fact, the earth's core has been estimated to be as low as **2,300** degrees and a high of **7,300** Degrees **Kelvin**.

Just that one **EGREGIOUS error**, should dis-qualify him, from ever being thought of as an expert, on **Global Warming!**

I am surprised that leading scientists in the world, have **NOT** pointed that out to the Newspapers, other politicians, AND the people.

Attached below hereto, please find an alert, which is attempting to do so! In view of the **Copenhagen** meeting, it is now more urgent than ever, to get the facts out!

**Do NOT Let the politicians destroy the World's economy!**

To see the **beneficial effects** of **Global Warming!**

**See the following**

**Beneficial Global Warming**

**EMERGENCY: The United States**, (as well as the whole world), **is attempting to fix a problem, which does NOT exist!**

Over the last **100 years**, the global temperature has **increased 1/4 of 1 degree**. Let us assume man continues using oil for the next **100 years** and further assume it is responsible for said continued temperature increase. Then even though the temperature **might** increase another **3 degrees**, during that period, **oil** resources will have been considerably diminished, **if not exhausted**.

They will certainly be producing a lesser amount! Many of earth's oil wells were **already** reporting diminishing output, (in the early **2,000's**)!

Want enough water to sustain the earth's inhabitants plus agricultural needs? **Earth's** population is increasing by over **62,000,000** people a year. In the last **70 years**, (2008), man's population went from **3 Billion** people to **6 Billion**. Therefore, in the next **100 years**, the population will exceed **16 Billion** people, (plus a commensurate amount of animals)

**AND** the additional agricultural needs!

Because **70%** of the **earth's FRESH** water is in storage as **ice & snow**, the modest **TEMPORARY** increase of global temperatures, will continue to release additional supplies of water. Even the prodigious amount of coal remaining, can be cleaned/scrubbed, (with the use of electricity), so that IT would **NOT contribute** to any further warming. Want to get rid of **CO2**?... Science has already proven, that can be done also!

At some point in time, with **less** greenhouse gasses being released, **equilibrium** would be reached, where **NO** further greenhouse gasses are generated. Therefore, there will be **NO** more melting of **ice/snow**! At that point, & for millennia thereafter, (since **70%** of the earth's surface is water), through **desalination**, water can be **distributed** more evenly on earth, (via pipeline). (For instance), pipe water to **Arizona**, or any other area on earth, where **needed/desired**!

Perhaps, we might even create an enormous fresh-water lake, in **Death Valley** in part of the **Mojave Desert (292)** ft below sea-level in **California**. Because of the tremendous amount of heat in that desert, evaporation of water will also tend to lower the air temperature! Water from that lake, can then be used for irrigational purposes, (which some of the surrounding areas are currently **(2009)**, experiencing)!

Water can be continuously piped in, ... to make up for evaporation & agriculture losses/uses! That would provide a counter-balance to all the ice, which has melted into the oceans. It would also tend to **lower the level of the ocean**!

The **last resort** for having enough water, in the **right places**, at the **right times**, is as follows: Even Atomic Energy, supplied by **Uranium**, is a **FINITE** energy source, but alternative **renewable** resources, can supply all the **electricity** civilization needs **FOREVER!** With an inexhaustible supply of electricity, earth's science, may make, **(synthesize)**, all the water earth needs, thereafter!

For the rationale, (**and more detail**), behind these statements, go to the following link:
