

## **BIBLECODES - A SCIENTIFIC EVALUATION**

I have recently (August 1999) read an unflattering opinion in "Christianity Today" about Michael Drosnin and his published Bible Code Book, by one Dr. . . . (PhD) of the Theological Seminary located in W W W, U S.

Even more recently (October 7, 1999), I read an even more unflattering refutation of Drosnin et al, written and circulated on the internet by another self-ordained expert on the bible, an alleged computer scientist, linguist etc., one X X X , who reveals that he is Jewish and basically, Drosnin and his teachings are bulls..t.

These 2 critics, although each without the knowledge of the other, both have one thing in common! Neither has run the Bible Code routine. I know this to be a fact because I have run the codes on my computers, personally, for over 4,920 hours over the past several years, using a 550 MHz computer, then an 800 MHz computer and now a 1.4 GHz computer.

I have conducted 2,446 (exactly) Equidistant Letter Search (ELS) searches for "Torah", in all 39 books, and thereby documented 5,731,901 of such spellings. That is 2,166 searches, in increments of 30, from ELS 1 to ELS 65,000, and then 280 more searches, from an ELS of 65,001 to ELS 100,000, in increments of 125 via the new (September 1999) Bible Codes 2,000 program.

I have also conducted 7,200 (exactly) ELS searches for "Yahweh", in all 39 books, and thereby documented (exactly) 18,601,783 ELS spellings of such word. That is 6,500 searches from 1 to 65,000 in increments of 10 and 700 searches from ELS 65,001 to ELS 100,000, in increments of 50 on the Bible Codes 2000 program.

The reason for these curious ELS searches is because of constraints written into the programs. I still have to research more "Torahs" and "Yawehs" from ELS100,001 to ELS (299,230). (the highest ELS possible for a 4 letter word). My educated guess would be an additional 500,000 "Torahs" and an additional 1,600,000 "Yawehs" (a ratio of approximately 3.2 more "Yawehs" than "Torahs"). The basis for the 3.2 superiority is also documented.

There are still technical constraints programmed in each program, which I will not discuss herein. However, if anyone wishes technical details, I will be pleased to reveal same with bonafide researchers/requests. My E mail address is: [ccifaldi@tampabay.rr.COM](mailto:ccifaldi@tampabay.rr.COM).

At this point, let me reveal my pedigree to you. I am a Holy Roman Catholic. My total knowledge of theology could fit nicely, in a thimble.

I am a non-degreed Electronic Engineer with 3 patents. The 1<sup>st</sup>, is of an Electron Gun design, in 1952. The 2<sup>nd</sup> is for a Fiber Optic, High Resolution, Optical Communication System (Video Telephone), full-motion, real time, informational network), Patent # 5,703,636, dated 12-30-1997. The 3<sup>rd</sup> is for a Hybrid Solar Heater Patent # 6,372,978 B1, (4-16-02).

I have also served as a private criminal investigator for several attorneys over a period of **17** years. I manufactured picture tubes, for some **25** years (as **Chief Engineer**, **Plant Manager** and **Owner**).

I do **not** know Michael Drosnin. I am **not** employed by him. I expect to make **no** money from him, or anybody else. I object to **“impartial”** opinions from experts, (perhaps in other fields), inserting unsolicited bad-mouth, even foul-mouth discussions, about something they know nothing about.

Remember what I said in my opening remarks – neither W W W nor Dr. W W have run the program(s), in their own way, with no help nor misleading advice, from any other party. I am an expert – that’s why I can make the statement that neither has tried the program(s) available. I can tell because of what they say and/or fail to say.

To educate, all **“expert”** Bible Code **“opinion-givers”**, please be aware of the following (a partial listing):

1. All codes found in the Book of Genesis disappear, when the exact words (containing the exact letters), are scrambled. This proves, contrary to Dr. W W W’s contention, among other imprecise musings, that sequence of words is **indeed meaningful**. That is to say – a normal reading reveals codes. A scrambled version of Genesis results in the **disappearance** of found codes!! For example:
2. Mary had a little lamb, its fleece was white as snow (bible codes intact)  
Snow Mary as had white a was little fleece lamb its (bible codes disappear)
3. There are exactly **1,196,922** letters contained in a complete rendition of the Hebrew **39** books (for the purposes of interrogation) which are arranged in one single line, of said Bible, without spaces.
4. One equidistant letter search (ELS) for **Jesus Christ** at **5,771** (that is **5,771** columns arranged in **207.40288** rows) is now ready for investigation. With Jesus Christ, appearing approx. near column **27**, Row **12**, in an **85**-column X **35**-row “snapshot” matrix, I have documented **137** relevant words. To be considered for important relevancy, .....position in the matrix is also extremely important.
5. Only **2,975** letters may be used (**85 X 35** matrix = **2,975**). Continued research in a **64 X 20** (exactly **1,280** letters, prox **320** liturgically-supplied words) matrix, has revealed those relevant, ELS-compliant, words (subcodes)....(**Jan. 5, 2005**).
- 6 At that new Matrix, **1,195,642** letters are discarded! They are not/can not, be used for any hidden codes in the **Jesus Christ** ELS **5771** code revelation. Examples of relevancy/position is as follows: One letter of Mary (**heh**) is common with the **“heh”** directly

6. Cont'd linking "Jesus" with "Christ". The word "Trinity" is attached to "Christ" through a shared "shin". The word "Crown" intersects "Jesus Christ" at a diagonal angle to the key code (Jesus Christ ELS 5771), etc, etc.

7. Besides the 320 words, relative to Jesus Christ, and in exactly the same snapshot matrix of only 1,280 letters, I have found all of the following prayers contained therein.

The Lords Prayer      Hail Mary      Act of Faith      Act of Hope      Act of Love  
Act of Contrition      Apostles Creed      Hail Holy Queen      Sign of the Cross

At this point, in the 5771 ELS matrix, I have found approximately 700 words (yielding approximately 2,800 letters) of the 1280 letter spaces available, (many words overlap other words. This confirms my belief, that each and every matrix, will be completely filled with words relevant to the key code.

I will be happy to send, to qualified investigators, a copy of all 320 words found to date (as well as all the prayers) in the "snapshot" Jesus Christ 5,771 ELS or any other data mentioned hereinbefore.

Words, **not found**, because I could **not find** them, or was unable to spell them in Hebrew – (no excuses), but **not found** to date, are subject to further investigation. There are still things to be done which will absolutely reduce the "words – **not found**" category – of 62, (or prox. 10% of words found). Admittedly, there are many duplicates in several prayers.

According to my investigation, the Bible Codes are structured in such a way, so as to give man free choice, (up to a point), in that, the future may be revealed and even changed, giving man the ability/opportunity to do so. But the creator/the writer(s) of the Bible already knows what choice we have made. For example, the Bible Codes revealed that Yitzhak Rabin would be assassinated, 1 year before it was done. (Afterward, the killer "Amir" was located in the same matrix).

Since Rabin chose to ignore that warning, he was assassinated, so there is/was **NO** further revelation concerning Rabin necessary. One of the options, in his "cross road", was to be assassinated. Needless to say, any of the other 4 options would have continued his journey through life (to the next cross road).

The day after election, Hebrew newspapers confirmed that Prime Minister Netanyahu was not elected. The Bible Codes disagreed – in advance. When write-in votes came in, such provided the margin of victory. Therefore, contrary to published Israeli newspapers, Netanyahu was elected Prime Minister.

The Bible Codes revealed that he would be assassinated in Jordan. Since he cancelled his trip

to Jordan, he could NOT be killed in Jordan. Basically there are as many as **5** choices at each “**cross road**”. Each person may go through as many as **100** “**crossroads**” or ultimately one, in their lifetime, which was the case with Rabin.

Certain words, related to **John Kennedy Jr**, were likewise found (after the fact). As I indicated hereinbefore, word placement is probably more important than words found. For example, consider the following: **John Kennedy Jr.**, ELS **27,028**, in a matrix **85 X 35** (again **2,975** letters to be used only!) These words, with significant location were found, by myself.

- A. “To die” shares a mem with “water”. (mem is a Hebrew letter)
- B. “**John Jr**” birth year “**1960**”, attached to **2** words which I refuse to put into writing, but I will reveal same to acknowledged investigators only, by word of mouth or by telephone. The promise must be made never to reveal those words to any **3<sup>rd</sup>** party (in writing).
- C. “Wife” shares birth year “**1960**” alongwith one of the non-disclosed words.
- D. “Accident” crosses “Plane”.
- E. “Mother” encloses “Jackie” and Cav (another Hebrew letter) of “**1960**” (in line enclosed by “mother”).
- F. “Father” shares aleph with “President”.
- G. “Jackie” is spelled out within ELS box formed by “Mother”.
- H. “John” perpendicularly attached to “Kennedy” (key code ELS **27,082**).
- I. “Junior” ends at a diagonal, the shin within “**1960**” and 1 non-disclosed word.
- J. “To die”, at a diagonal, sharing that same shin just mentioned.
- K. “Plane” crosses “accident”.
- L. “Ted” shares dalet with “Uncle”.
- M. “Wife” crosses “**1966**”, her birth year.

The foregoing represents a six-hour search and **may** or **may not** represent the best possible research of John Kennedy Jr. But, it will suffice unless I want to do a more in-depth study. I probably will not!! Any of **2,975** letters in the ELS-found code may be used, horizontally and/or vertically so that a thorough search may take as long as **1** year. The ELS I used, for Kennedy Jr. was **27,082**.

It is also my belief, that each and every matrix about each and every person who ever lived/will live, can be filled entirely with words relevant to the key code/person etc. In **1,196,922** letters, there are exactly **305,485** words, exactly **3.918104** letters per word (average **4** letters per word). Therefore, the highest ELS search possible, of any **4** letter words is an ELS of **299,230**.

I have reams of documented information, the likes of which, any competent investigator would need, to be admissible in a Court of Law, according to the “Rules of Evidence”. Needless to say, they are too numerous/voluminous to be listed herein.

I will answer any and all questions relative to scientific investigation from bonafide questioners.

I can answer no questions theologically, because I have little... or no... knowledge of theology.

As per agreement with the **Right Reverend Monsignor Mark Giordani**, Pastor of **St. John's Cathedral**, in the City of **Paterson**, State of **New Jersey**, he is in charge of theology and I am in charge of science. I am proud to serve as an usher at the Sunday **11:30** A.M. mass and I pray for, (among other things) God to enlighten me theologically and to guide my continued scientific probe of the codes contained in his message(s) to humanity. My approach to the Bible Codes is strictly scientific with absolutely no weight (by myself), given to religious teachings.

Since Mr. W W W likes challenges, I hereby challenge Mr. W W W to target any subject, with any ELS designation in any book he desires – War & Peace, Moby Dick, Mandarin Chinese epic tale, in any language, that he as a linguist, would care to use/invent. No, Mr. X X X, you can not research the Bible Codes in German, because God was Hebrew and he wrote/caused the Bible to be written, in Hebrew. However, you have my permission to translate any German written document into Hebrew and test it accordingly to the rules/constraints, under which the Bible Code **2000** program has set up, and to which I have adhered.

Naturally I would expect the Mandarin Chinese tale to be translated into Hebrew. But, I also have no objection in your use of the Mandarin Chinese epic tale, in its own language. And when you find the recipe for duck a l'orange, put it, as the key code, in an **85 X 35** matrix of Mandarin letters. Having done this, now find **94** ELS words relative to the key code. When that is complete, find me **500** more words, relative to Duck a l'orange in the same matrix.

If you do these things, then please find, in the same reference book, using the same language, all of the following: Abraham; America; Apollo Spacecraft; Armageddon; Armstrong, Neil; Auschwitz; Autobus & Date; Bach, Johann Sebastian; Beethoven, Ludwig Von; Bibi; Bible Code; Boothe, John Wilkes; California L.A.; California S.F.; Christ, Jesus; Churchill, Winston; Cifaldi, Carmine; Clinton, President; Communism, China; Communism, Russia; Depression & Date;

Di, Princess; Dinosaur; Earthquake; Kobe & Date; Earthquake, Okushiri & Date; Earthquake, Tangshan & Date; Edison, Thomas; Eikmann; Einstein, Albert; Gandhi, M.; Goldstein; Grant, General; Gulf War & Date; Hafez, Asad; Hamlet; Hebron 1929; Hiroshima; Hitler; Homer; Jaffa Road; Jerusalem; Jupiter; Kadaffi; Kennedy, J.F.K. President; Kennedy, John Jr.; Kennedy, R.F.; Koresh; Lee, R.E.; Libya; Lincoln, Abe; Macbeth; McVeigh, Timothy, day & hour; Monroe, Marilyn;

Moses; Murrah Building, Time & Date; Napoleon; Nazis; Netanyahu, Prime Minister; Newton; Nixon; Oswald, Lee Harvey; Pearl Harbor; Rabin, Yitzhak; Amir; Tel Aviv; Roosevelt, FDR; Roosevelt, Ted; Russia; Sadat, Anwar; Sarin; Savin; Scuds & Date; Shakespeare; Shinrikyo,

Aum & Date; Shoemaker-Levy & Date; Sirhan, S; Swift Tuttle; Titanic; Toledano; Tomb of the Patriarch, City, year, amount paid; Tunnel; USA; Watergate; Wayne, John; World War 1; World War II; Wright Brothers; Zyklon B.

**Do not forget**, I would expect you to find at least **15** relevant words in each matrix with an ELS of **10** or less. This would translate to the use of approximately **60** letters.

Let us not ignore Dr. W W W. My good doctor, you may also use Moby Dick to participate in his quest. Since everyone is acquainted with your PhD Theology credentials, please supply additional scientific credentials, especially those related to investigations, investigatory techniques, scientific credentials of any type, etc. that are as yet undisclosed in your pedigree, which would indeed make you an expert in critiquing the bible codes.

Your apology is due to Mr. Drosnin; for the slanderous remarks (the only legal defense of slander in the U.S. is the truth) you have written, in the **July 12, 1999** issue of "Christianity Today", entitled "**A Cracked Code**" (double entendre?), That, apology, Dr. W W W is certainly in order. Especially, if you took another look and saw that you acted hastily without proper investigation. Your slanderous remarks are as follows:

1. Deliberate mistranslation
2. Quirky methods
3. Worthy of skepticism
4. Who has created the secret code? The writers of the Hebrew Bible or Drosnin himself (Heavens to Betsy – a conspiracy). For what purpose?
5. In any sufficiently long text, you can come up with names and messages of all sorts, you just need to get lucky? **How do you propose to go about instructing someone to get lucky?**
6. The Bible Code Theory is bankrupt (because non-expert W W W says so). Why don't you team up with an Agnostic, who has investigative experience? Since he knows there is no **God**, he will truly be an impartial investigator of any potential codes in a Jewish epic/tale. **No knowledge** of Theology is required. You and he will only need a reasonably fast computer and the Bible Codes **2000** CD to load in said computer. I would be more than happy to loan you my program, upon which, I based all my findings.
7. One can "prove" a lot of things by statistics, that in fact, aren't true at all (you got that one right, thank God). For anyone requiring the 1 page dissertation by Dr. W W,W it is yours for the asking, write, wire or phone. **No cost** – No strings attached. Such a "worthy" document should be available worldwide.

I have heard, many sources say, there are so many people involved, in so many different languages that there are bound to be many errors/misconceptions/mistranslations etc. in the Hebrew Bible (as well as King James). My answer to those people is as follows: **No** man can change the will/word of **God**, and in the final analysis, only that Bible, which He,

His **Son** and the **Holy Spirit** wrote, either directly or indirectly, through the prophets, can ever remain/be used till the end of the human/sentient Universe. In other words, one error **reproducing/copying/translating** the bible will be re-corrected by another error in a following reproduction.

The laws of entropy **do not apply** to **God's** words. Finally to date, I have conducted some **80** Million calculations in my research, using the most powerful computers that I could buy.

All of the experts in Theology, are **not automatically qualified** to discuss the Bible Codes, because the Codes have **nothing to do with Theology**. They are the **Creator's** way to provide permanent informational record of man, for man's use, of every individual who ever lived/will live including those alive today. The **Creator** knows why he did this. I surely **do NOT!**

Man, may or may not, discover the reasoning therefore. Exploration of the Codes contained in the Bible require persons with investigative talents, mixed in with common sense and intelligence, with **no regard whatsoever**, to any religion!

For those people who want a job lasting the rest of their lives, you may investigate **6 X 68 (408)** matrices of Jesus Christ ELS **5771**. There are presently **3** more key codes of **9-letter** Jesus Christ spellings residing at ELS locations of **10,059; 18,195** and **35,433**, plus **38** JESUS CHRIST **8-LETTER SPELLINGS**. Again, each ELS finding would require the study of **408** matrices, each "**snapshot**" matrix of **85 X 35** means using only **2,975** letters as a repository for words contained in **each separate** matrix (**derived from actual scripture**).

All through this document, I have referenced a matrix of **85 X 35**. For technical reasons, I have opted to modify the matrix to an **81** column X **39** row matrix. The **Jesus Christ** key code is still at ELS **5,771**. Whereas the "Plus" program measures each and every matrix at columns 1 through **85**, (C **1** to C **85**), the "**2000**" measures them by exact column number. So instead of the key code ELS residing in column **27**, it is now residing in column **#4078**.

The "**2000**" allows you, (as I have indicated herein) to interrogate **71** separate matrices, one by one. For example, the matrix formed by columns **1** through; then another matrix from C**83** through C **164**; then matrix C **165** through C **246**; etc; with the last matrix being C **5,690** through C **5,771**. Each matrix is independent from any/every other one.

For the purpose of illustration herein, the key code, "**Jesus Christ**" residing in ELS **5771**, is now situated as follows: The modified **5771** matrix, is **81** columns X **39** rows (total of **3,159** letters instead of **85 X 35 – 2,975** letters). The key code, "**Jesus Christ**", is thereby situated in (column **#4078**, in a matrix bounded between columns **4041** and **4122**), starting at row **20** and ending in row **28**, in the vertical alignment.

Earlier, herein I had disclosed, that the only letters allowed to be used, in the ELS **5771** are those visible in the TV screen. Proof of this claim follows. (Later investigation has shown that as little as few as **135** words (**540** letters), or even **22** words (**90** letters) at times, are used).

This claim is fully proven and explained, in another document I have authored, entitled:  
**“HOW THE BIBLE CODES ARE FORMED”.**

The name of “Joseph” resides in the following location(s):

Yod	column 4095	row 26
Vav	column 4104	row 29
Samech	column 4113	row 32
Peh(f)	column 4122	row 35

The “Peh” in “Joseph” is positioned in column #**4122**. When I move the matrix over, **(1)** column, so that the highest column number available is #**4121**, then in that case, “Joseph” can no longer be found because the “Peh” (ending his name) is one of the letters discarded, proof positive that all the letters in the bible are **not available** for “Drosnin’s hocus pocus”, NOT EVEN **3,600** letters (in a **90 x 40** matrix), and only those letters visible in the TV screen matrix may be used!

The “Peh (f)” in the bible is actually printed as a “Peh”. There are **no final letters** printed in the original bible, the **5** final letters were added by Hebrew Scholars. **“No man can change the will/word of God”.**

Finally the **“2000”** program allows you to actually fabricate **71.246913** (rounded to **71**) different matrices (when considering **“Jesus Christ” 5771**) in the horizontal plane.

Unfortunately, the **“2000”** program, allows only one vertical alignment of the matrix, instead of **(5.3180223** rows) rounded to **5** matrices in the vertical plane. This, of course, means that only **71** different ELS **“Jesus Christ” 5771** matrices can be interrogated, not the theoretically possible **355** matrices. (This does **not** take into account a much greater number of permutations, should that option be written into the next Bible Code program).

Through manual effort, (without the aid of a computer), I have interchanged the word containing the “tav”, with the word containing the “resh” in chapter **1** of Genesis. I then instituted a letter-by-letter search for Torah ELS **50** in that chapter. Where I previously documented **5 – 50** ELS **“Torahs”**, now none were found. Further, no **“Torahs”** of any ELS can be found in the entire **1<sup>st</sup>** chapter.

While this simple interchange of only **2** words does not prove conclusively that “scrambling” causes the presently discovered codes to disappear in all **39** books, it certainly adds credence to the authors of the Bible Code program which state, they have scrambled the whole book of Genesis (by computer) and found that almost all present existing codes are no longer contained therein (a few codes, by chance, without the usual “cluster” effect might still be found).

Further, there are several other codes, rooted in the **1<sup>st</sup>** chapter of Genesis, that have likewise disappeared. I have asked Computronics for that program so that I can interrogate their scrambled version of Genesis myself, without reliance on their claims, (which I am inclined to accept).

**President Ronald Reagan said it bluntly, .... if not elegantly..... “Trust – but verify”.**

To finish this point, all words (intact) containing all the proper letters are likewise faithfully reproduced. To add more credibility to my statements, I have documented **41 – 65,000** ELS “Torahs”. **Four** of these codes namely sub codes 1, 2, 25, 26 have now likewise disappeared, because they start or end in the book of Genesis.

One more example, upon which I base my opinion is that I have conducted an ELS search, from **1** to **100,000** for the word “Jesus”, which produced **4,706,994** ELS “Jesus” codes. I have not arrived, as yet, to an approximation of any amount of ELS “Jesus” codes, in existence, from ELS **100,001** to ELS **299,230**.

At the point of overkill, it is also my opinion that scrambling of the entire Bible (**39** books) or even removal of one word from the **305,485** words (**305,484**) words will result in the loss of **99%** of presently found ELS codes. The **1%** or less (if any) ELS codes found, will exhibit few, if any “cluster effect” words relevant words. Such ELS codes would be subjected to the same tests and constraints of an 81 X 39 letter matrix, as used and discussed herein.

I have in my possession, researched and documented many, many interesting facets of the Hebrew Bible, which may be added to my web site, from time to time. To other bonafide researchers, I could probably assist in furthering, you, in your own way, difficult areas of analysis, research.

“Jesus Freaks” are not invited to seek assistance from me. Theological questions/answers are **not** available from me, or, my research.

Scientific interrogation to you, (the reader of this material) will certainly receive assistance from my data and/or myself. Such assistance from me could be in the form of telephonic communication, fax, written letter, E-mail and/or an updated web site. There is/will never be, any charge for my services.
