

12-15-2009

Dear Mr. Geoff Pohanka:

Perhaps you may be interested in my analysis of Global Warming. Over the past several months, I have been sending this Email to hundreds of Newspapers, politicians, reporters and assorted organizations. In view of the Copenhagen, **about-to-happen fiasco**, it is vital, that we stop the politicians from attempting to fix a problem...**WHICH DOES NOT EXIST!**

VERY IMPORTANT!

Do **NOT** let the politicians destroy the World's economy!

To see the **beneficial effects** of **Global Warming!**

See the following:

Beneficial Global Warming

EMERGENCY: The **United States**, (as well as the whole world), **is attempting to fix a problem, which does NOT exist!**

Over the last **100 years**, the global temperature has **increased 1/4 of 1 degree**.

Let us assume man continues using oil for the next **100 years** and further assume it is responsible for said continued temperature increase. Then even though the temperature **might** increase another **3 degrees**, during that period, **oil** resources will have been considerably diminished, **if not exhausted**. They will certainly be producing a lesser amount! Many of earth's oil wells were **already** reporting diminishing output, (in the early **2,000's**)!

Want enough water to sustain the earth's inhabitants plus agricultural needs? **Earth's** population is increasing by over **62,000,000** people a year. In the last **70** years, (2008), man's population went from **3 Billion** people to **6 Billion**. Therefore, in the next **100** years, the population will exceed **16 Billion** people, (plus a commensurate amount of animals) **AND** the additional agricultural needs!

Because **70%** of the **earth's FRESH** water is in storage as **ice & snow**, the modest **TEMPORARY** increase of global temperatures, will continue to release additional supplies of water. Even the prodigious amount of coal remaining, can be cleaned/scrubbed, (with the use of electricity), so that IT would **NOT contribute** to any further warming. Want to get rid of **CO2**?... Science has already proven, that can be done also!

At some point in time, with **less** greenhouse gasses being released, **equilibrium** would be reached, where **NO** further greenhouse gasses are generated. Therefore, there will be **NO** more melting of **ice/snow!** At that point, & for millennia thereafter, (since **70%** of the earth's surface is water), through **desalination**, water can be **distributed** more evenly on earth, (via pipeline). (For instance), pipe water to **Arizona**, or any other area on earth, where **needed/desired!**

Perhaps, we might even create an **enormous fresh-water lake**, in **Death Valley** in part of the **Mojave Desert**, (**292**) ft **below** sea-level in **California**. Because of the tremendous amount of heat in that desert, evaporation of water will also tend to lower the air temperature! Water from that lake, can then be used for irrigational purposes, (which some of the surrounding areas are currently (**2009**), experiencing a severe lack of water! Water can be continuously piped in, ... to make up for evaporation & agriculture **losses/uses!**

That would provide a counter-balance to all the ice, which has melted into the oceans, because the ice occupies more water space, than the water it melts into. It would also tend to **lower the level of the ocean!**

The **last resort** for having enough water, in the **right places**, at the **right times**, is as follows: Alternative **renewable** resources, plus **atomic fission**, can supply all the **electricity** civilization needs **FOREVER!** With an inexhaustible supply of electricity, earth's science, may make, (**synthesize**), all the water earth needs, thereafter!

For the rationale, (**and more detail**), behind these statements, **go to the following link:**
