Re:: Scientific Papers

Dear Mr. Powell:

Perhaps you may be interested in viewing my website: [www.cifaldi.org](http://www.cifaldi.org) It contains eleven (11) scientific papers, on various subjects, heretofore written by numerous authors, in past Discover Magazine Issues,!

Also contained therein, you will find references to Atomic Energy. This reveals a *little publicized, (un-realized?), FACT*, that there is only enough Uranium, [at 2009 usage rates], (alongwith current known-reserves), to last approx (150) years!

**More bad news:** Oil sources will be **depleted at about the same time!** Finally, unless there is a mitigating factor(s), the world population will **exceed (24) Billion** people

The conclusion would indicate that a *“Manhattan Project”* to **renewable-energy** independence, would be the wisest way for the U.S., [World], to proceed **poste haste!**

On yet another subject I believe, (with all due modesty), that I **AM** the foremost expert in the world, relative to the **NOW**, lost art of the *Manufacture of Picture Tubes.*

You may see it on my website, in a comprehensive (75) page, (“how to”), document. It is also published, on the internet, in & under the stewardship of Wikibooks. I am well-researched, by/in Google, Clusty, Yahoo, Bing as well as many other internet search-engines!

Yours Truly,

Carmino Cifaldi  
(941) 351-8616  
[www.cifaldi.org](http://www.cifaldi.org)

See my **Pedigree** therein, as well as **Asteroid Deflection Possibility!**
