**DO NOT ALLOW the POLITICIANS to DESTROY the UNITED STATES/WORLD!**

The **United States**, (as well as the whole world), is attempting to fix a problem, which does **NOT** exist! Over the last **100** years, the global temperature has increased, (depending on source), **1/4** of **(1)** degree. Let us assume man continues using oil for the next **100** years and further assume, it **IS** responsible for said continued temperature increase.

Then even though the temperature might increase another **3** degrees, during that period, oil resources will have been considerably diminished, if not exhausted. They will certainly be producing a lesser amount! Many of earth's oil wells were already reporting diminishing output, (in the early **2,000's**)!

Do you want enough water to sustain the earth's inhabitants, plus agricultural needs? Earth's population is increasing by over **(62,000,000)** people a year.

In **70** years, **(1938-2008)**, man's population went from **3** Billion to **6** Billion people. In the next **(100)** years, unless there is a mitigating factor(s), the population will exceed **(16)** Billion people, (plus a commensurate amount of animals) AND the additional agricultural needs!

Because **70%** of the earth's **FRESH** water is in storage as ice & snow, the modest **temporary** increase of global temperatures, will continue to release additional supplies of water. Even the prodigious amount of coal remaining, can be cleaned/scrubbed, (with the use of electricity), so that **IT** could **NOT** contribute to any further warming.

Do you want to get rid of **CO2** Science has already proven, that can be done also!. At some point in time, with less greenhouse gasses being released equilibrium would be reached, where **NO** further greenhouse gasses are generated.

Therefore, there could be **NO** more melting of ice/snow attributed to mankind! At that point, & for millennia thereafter, (since **71%** of the earth's surface is water), Through **desalination**, water can be distributed more evenly on earth, (via pipeline). For instance), pipe water to **Arizona**, or any other area on earth, where needed/desired!

Perhaps, we might even create an enormous fresh-water lake, in **Death Valley**, (part of the **Mojave Desert**), **California**, which is **(292)** ft below sea-level! Because of the tremendous amount of heat in that desert, evaporation of water will also tend to lower the air temperature!

Water from that lake, can then be used for irrigational purposes, (where some of the surrounding areas are currently **[2009]**, experiencing a severe lack of water)! Water **can** be continuously piped in, to make up for evaporation & agriculture **losses/uses**!

That would provide a counter-balance to all the ice & snow from land areas, which has melted into the oceans. Then again, ice already floating in the Oceans, which has already done its part in raising the water-level of the oceans, would now be partially counter-balanced. That is because **ICE** may be seen as **"expanded"** water. Freezing turns any given

volume of water, into a **(9 %)** **GREATER VOLUME** of **ICE**.

Basically, ice occupies more water space, than the water it melts into. It would also tend to lower the level of the oceans, (**NOT** adding to their rising)! The ice, which was on top of land, was the ice, when melted, **already ADDED**, to the oceans' height!

The last resort for having enough water, in the right places, at the right time, is as follows: Alternative renewable resources, can supply all the electricity civilization needs **FOREVER!** With an inexhaustible supply of electricity, earth's science, may make, (**synthesize**), all the water earth needs, thereafter!

**Note:** Man can **NO** longer count on **Uranium**-produced Atomic Energy, because, IT is also a **FINITE RESOURCE!** At the **2009** rate of use, there is only enough **Uranium** to last, **LESS THAN (150}** years! Worse yet, oil-reserves, (at about the same time), will be close to being depleted, (becoming a memory)!
