

To Harry Fuller:

To correct a problem, you must first recognize it ...as a problem!

Right now, the world Politicians are attempting to fix a **problem** which **DOES NOT EXIST!**

Once they realize that the problem of Global Warming is controlled by Nature AND there is nothing they can do to stop/legislate it...they will then turn to the next problem(s) at hand. Uneven water distribution, for one!

This is ALL addressed in my EMail Dissertation/analysis:

Do **NOT** allow the politicians destroy the World's economy!

To see the **beneficial effects** of **Global Warming!**

See the following:

The United States, (as well as the whole world), **is attempting to fix a problem, which does NOT exist!**

Over the last **100 years**, the global temperature has **increased 1/4 of 1 degree**. Let us assume man continues using oil for the next **100 years** and further assume, it **IS responsible** for said continued temperature increase.

Then even though the temperature **might** increase another **3 degrees**, during that period, **oil** resources will have been considerably diminished, **if not exhausted**.

They will certainly be producing a lesser amount! Many of earth's oil wells **are already** reporting diminishing output, (in the early **2,000's**)!

Do you want enough water to sustain the earth's inhabitants plus agricultural needs?

Earth's population is increasing by over **62,000,000** people a year. In the last **(70)** years, **(2008)**, man's population went from **(3) Billion** people to **(6) Billion**.

Therefore, in the next **100** years, the population will exceed **(16) Billion** people, (plus a commensurate amount of animals) **AND** the additional agricultural needs!

Because **70%** of the **earth's FRESH** water is in storage as **ice & snow**, the modest **TEMPORARY** increase of global temperatures, will continue to release additional supplies of water. Even the prodigious amount of coal remaining, can be cleaned/scrubbed, (with the use of electricity), so that **IT** would **NOT contribute** to any further warming.

Do you want to get rid of **CO2**?... Science has already proven, that can be done also!

At some point in time, with **less** greenhouse gasses being released, **equilibrium** would be reached, where **NO** further greenhouse gasses are generated. Therefore, there will be **NO** more melting of **ice/snow!** At that point, & for millennia thereafter, (since **70%** of the earth's surface is water), (through **desalination**), water can be **distributed** more evenly on earth, (via pipeline). (For instance), pipe water to **Arizona**, or any other area on earth, where **needed/desired!**

Perhaps, we might even create an **enormous fresh-water lake**, in **Death Valley** in part of the **Mojave Desert**, (**292**) ft **below** sea-level in **California**. Because of the tremendous amount of heat in that desert, evaporation of water will also tend to lower the air temperature!

Water from that lake, can then be used for irrigational purposes, (which some of the surrounding areas are currently (**2009**), experiencing a severe lack of water! Water can be continuously piped in, ... to make up for evaporation & agriculture **losses/uses!**

That would provide a counter-balance to all the ice, which has melted into the oceans, because the **ICE** occupies more (**9 %**), water space, than the water it melts into. **ICE** may be viewed as **“expanded water”**. The melting of **ICE**, would therefore tend to **lower the level of the ocean!**

The **last resort** for having enough water, in the **right places**, at the **right times**, is as follows: Alternative **renewable** resources, can supply all the **electricity** civilization needs, **FOREVER!** With that inexhaustible supply of electricity, earth's science, may make, (**synthesize**), all the water earth needs, thereafter!

For the rationale, (**and more detail**), behind these statements, **go to the following link:** <http://www.cifaldi.org/files/Global%20Warming%20&%20Oil%20Crises%2011-22-2008.pdf>
OR

as the case may be: Go to: www.cifaldi.org.... Klik on **FILES**.... klik on **Global Warming**

Subject: Re: Global Warming Nonsense

Even if the climate changes are ALL natural, we have no plans to deal with

the social and political disruption...imagine a thousand New Orleans, mostly In poor and well-armed parts of the world...and we rich folks will be the targets of hatred and terrorism...expect a return to well-fortified borders in every sense of the word, from soil to cyberspace

From 1938 to 2008, world population doubled (from 3 Billion to 6 Billion). In (2) more 70 yr periods, pop may be 24 Billion (if something isn't done to limit/control same), with a commensurate increase of livestock, agricultural needs & other vital uses!

ALL need water! 70% of the world's FRESH water is in the Antarctica, in the form of ice & snow. Hopefully, the warm-up will last long enough to add all that ice/water to the needs of humanity. NASA & I believe, that the SUN is responsible for (3) previous "ice ages" & thaws. I have 31 pages of my analysis, for any interest in same!
