

PEDIGREE for Carmine Cifaldi 9-19-2009

2009-Sept 19- MY Research into **Uranium** usage heretofore, (the fuel used to produce Nuclear Fission [**Atomic Energy**]), has discovered that there is only enough to last, (at **2009** rate),**140** to **150** years.. This does **NOT** take into account all the units soon to be constructed, over the next several years, [**2010** to **2015**...or more], **NOR** any future **new** Uranium ore deposit discoveries!

NOTE: Hopefully, a fusion reactor called **“Life”**, (**Laser Inertial Fusion Engine**), being developed by **Lawrence Livermore Laboratories**, using **“spent”** fuel rods, may be able to produce (**100**) times as much energy as they did, as when they were **new** fuel rods.

Such development, if successful, would go a long way to alleviating the energy crisis, solve the disposal process, and continue to supply **Atomic Energy**, long after the base material-supply,... **Uranium Ore**... is depleted!

2009 - April 19 Suggest a possible solution, to change the orbit of **Asteroids** colliding with **Earth**, using **ELECTRON/ION-BEAM TECHNOLOGY**. See Author’s Paper, **“Asteroid Deflection”** (**4 Pages**), in www.cifaldi.org. far superior than **Laser-Beam** technology!

2008-Sept 26 Provide the explanation for the **Double-Quadruple Principle**, (**D Q P**), which will enable the world to produce **ALL** the Electricity **ever** needed, by the Wind. See Author’s Paper **“Double Quadruple Principle”**, (**4 Pages**), in www.cifaldi.org

2008-Sept 23 Describe how and why **Wind-Generated Electricity** Units, serving as **“Wind-Farms”**, floating in the stratosphere **will SOLVE** the world’s Oil Crisis (2008). See Author’s Paper, **“Sky Wind Farms”**, (**6 Pages**), in www.cifaldi.org

It will alleviate the Global **Warming** problem, and it will also reverse **most**, if **NOT** all, the previous harm, it did.. It will also be able to turn **salt water** into **drinkable water**, send it to where it is needed, as well as actually being able to **synthesize** water!

2008 - July 28 Authored a paper on the **Global Warming/Oil Crises**. For an alternative view of **Global Warming**, in conjunction with the **Oil Crises**, see author’s (**30**) page 128 Kb **updated** document, in www.cifaldi.org

2008-July Defined the **Genesis** of the **Blu-ray Disc DVD** System, and **Carmine Cifaldi’s** contribution towards that remarkable data system! SEE: Author’s Paper, **“BLU-RAY GENESIS”**, (**3 Pages**) in my Website at www.cifaldi.org !

2008-Feb. Print ©1978 **The Ideal Educational System/Two Teachers in Every Classroom**

2007 – Sept **21**, Develop and **Copyright**, the concept of, **“The Living Book”**. This concept enables an Author, to continually **up-date/upgrade**, his already-printed book. The Author, may record new **information/data**, with as few as several lines of data, as and/or, a Page/Chapter, if necessary.

The author would post that new information on his/her own Website, (in my case as long as the Author would continue to post new, relevant data, (while still maintaining the Website), the Book would still be **“ALIVE”**.

Even after the demise of the author, and the cancellation of the Website, much data previously posted, might still be available in **Google, Clusty, Bing, Ask US, Yahoo**, or other Internet search engines.

2007- June- -- Continue to accumulate material for book, **Introduction to the Ideal Educational System © 1978 “TWO TEACHERS IN EVERY CLASSROOM”**, to be published in Feb **2008**, which will be added to the Book, as an **ADDENDUM!**

2007- May 1, Published an highly comprehensive document about the Manufacture of Black and White Television Picture Tubes (**CRT’s**), in **Wikibooks**, which is located at: http://en.wikibooks.org/wiki/Television_Manufacture_and_Repair **OR** find it in **GOOGLE : Television Manufacture and Repair** **OR** see, www.cifaldi.org For more information about the author, see **cifaldi,carmine** in **Google, Clusty, Yahoo**, **OR** in **BING!**

2006-2004 Accumulate material for the book, ©1978 **The Ideal Educational System (TTEC)**, and the lost art of the manufacture of black and white picture tubes.

2003 – **Hybrid Autos**, (not the author’s), being sold in **California** in **2000**, being sold, increasingly in the U.S.[and back-ordered **2004**]. In **2007** such represents the wave of the future. **Its time has come**. See **1963** re T.E.C., **herein**.

2002 – **April 16, 2002 Patent # 6,372,978 B1**. Patent Granted **43 Claims HS2 Solar Heater**, (with extended **BTU** storage capability), via super-dense material in fluid repository, which also precluded freezing problems; also including super-efficient sun-collection capabilities. See: **Cifaldi, carmine** in **Google, Clusty, Yahoo, BING**, **OR ... other Search Engines!**

2000 – Oct 5 - Used code in **Hebrew Bible** See Author’s **“Bible Code Origination”**, (**21 Pages**), and **“Bible Codes Scientific Evaluation”** (**9 Pages**), in www.cifaldi.org

2000 – Conceived, designed an automobile **Child Restraint Seat System** with unique characteristics, far superior to anything on the market today **NOT Patented!**

2000 – Conceived, designed, built, successfully tested in **1956**, **ION BEAM WELDER**, circa **1956, -1965**, for use in a vacuum or Outer Space. Notified **NASA**, as perfect for **NASA's Space Station construction/modulization**, then currently being done, see **1965** herein. Unknown if used! ? !

1998 – August 1, authored a **(6)** page document on **Swift-Water Rescue** techniques for **shore-based rescuers**, **boat-equipped rescuers**, with particular emphasis on the **proper use** of **Helicopter** in rescue modes. Sent copies to **210 Mayors**, living on or bordering large bodies of water, throughout the United States. See document in www.cifaldi.org

NOTE: Received positive response from **(8)** different Mayors. **(3)** weeks later, the City of **New York** practiced some of those techniques on Long Island Sound. Matter of public record (newspapers).

1997 -Dec 30, Received **Patent** for **High Resolution Optical Communication System Patent# 5,703,636**, (“**HiRocs**”)[**Full motion**, in **Real-time-Video Telephone [1,050 Line System]**], **[DECADES** ahead of the **Japanese 1080 Line System, HDTV]**.

This was based on my television background and my **1950s-era** foray, into a **High Definition Movie Camera** Filming of **Laparoscopic Gall-Bladder Removal**. See Patent Office complete disclosure at ([cifaldi, carmine](http://cifaldi.carmine)) in **GOOGLE, (U.S.), Yahoo, Clusty, ASK Us.com**

1996 May 14, Filed Patent on **(Video Telephone), High Resolution Optical Communication System (HIROCS)**, as per drawing of **5-3-1996**. See **1st** hand-drawing in www.cifaldi.org

1991 Experimented with Fiber Optic Cable to transmit **Ultra-high definition, Color VIDEO telephony**, with the accompanying **audio**, including **high-speed transmission of data**. It also included a Security system, for local/**State/Federal** implementation, as well as meter reading. See **1997 - Dec 30** and **1956 “designed and built ”** herein.

1987 As per **Mayor Francis X Graves**, I oversaw installation of **(3)** Turbines, to generate electricity, **(15 KW)** from the Passaic River, (**Great Falls**), **Paterson, New Jersey**. This was under a **(20)** year lease, with “**Independent Hydro Developers**”, (a private company). A Federal Grant of **(1.3)** Million Dollar Grant, (went to the City), was an inducement to lease out the project, as **Paterson** could **NOT** raise the **(10)** million dollars to accomplish it,!

Public Service Electric & Gas was required, by Federal law, to purchase **ALL** the electric power it produced. At the end of the **(20)** year period, **ALL** equipment, is to revert back to the ownership of the **City of Paterson!**

I assume that as at **2007**, this should have been consummated. I so notified the current **Mayor, Joey Torres**. I have **NOT** yet had the pleasure of a response!

1985 Oct 3 Received Law Degree from **Blackstone School of Law, Dallas, Texas**. Received credit for **122** Units, representing completion of **3,660** hours of study. See Picture(s) and Other relevant data, on www.cifaldi.org

1983 Appointed **Chairman of Passaic County, N.J. Energy Commission**. Served for **(6)** months, then resigned. I notified the **Carter Administration** (& every Presidents' administrations thereafter), of what I would do to ease, if not solve the Energy problems facing the U.S. See official calling card on www.cifaldi.org .

{Still valid Information available Sept 21, 2008}

1983 – Personal energy-advisor to State Senator of N.J./ **Paterson, N.J. Mayor Frank X. Graves; State Assemblyman Ozzie Pelecchia; Passaic County Freeholder Director Edward O'Byrne**. As such, represented the State of **N.J.** in **Washington D.C.**, for Federal funds for Passaic County, with **Assemblyman Pelecchia**. Ultimately got **NONE**. Matter of Public Record.

1980 – **Built Electronic devices**, from parts, with **plug/unplug capabilities**, much like **Dell Computer** start-up. Unplug one bad part of **(6)**, replace with a spare, return to office and repair broken part, when time permitted.

1978 – March 11, offered to set up a T. V. Tube Manufacturing Plant and Cabinet-manufacturing operation. **I also** promoted **Intra-School T.V. hook-up**, linking all schools in the **Dominican Republic**, (just like **Paterson School District** did under my advisement), in **1999**).

It never came to fruition because my contact, a leading candidate for the Presidency, was assassinated. The Educational part of the document suggested a modern, unique, effective, highly Technological Educational System. Later, it became the subject of the book, **Feb 25, 2008, ©1978 The Ideal Educational System/ Two Teachers in Every Classroom**.

1978 – Started a **3,360-hour** course in Law, and was awarded a **Law Degree** by **Blackstone School of Law, Texas**, See **1985 Oct 3, herein** Picture of Diploma, & other relevant data on www.cifaldi.org

1976 – Received **(6) month** comprehensive course, in **Analytical Accounting**, with a private tutor (**CPA**), from a New York Accounting firm .

1975 – Took **(6) week** Computer Programming course, **(95) hour** duration with **RCA, 11th St., Manhattan, N.Y.C.**– Received degree.

1968 -- Filed for **Bankruptcy** in **Television Picture Tube** business.

1967 – Invented, designed, built (on the roof of a box-fabricating factory) in **Paterson, New Jersey** , an **Hybrid Solar Heating Unit**, **Hot water/Hot air**, using the **Sun** and **Wind** as

energy sources. Achieved **180-degree** air being introduced inside the building, outside temperature, **(0)-degrees Fahrenheit**, **25 M.P.H.** wind speed, bright sunny day.

It was modified later (**April 2002**) using hot water, super-efficient collection system, coupled with enhanced heat-storage capability. **Patent # 6373978 B1**. See **GOOGLE**.

1966 – Experimented with radioactive materials, (**Radium D** – half life **1,500** years) in conjunction with work related to **Atomic Energy Commission** in (**Washington D.C.**).

1965 – Built and sold T.V. tubes used in **RCA, Sylvania, GE, Sony, Sharp, Olympic Radio**, T.V. Sets. See: **©1978 The Ideal Educational System/Two Teachers in Every Classroom**, **Nov. 2007**.

1965 – Conceived, designed, built a **Ray-Gun** (**Electron-Beam** precursor to **Ion-Beam** welder), for my son's school science project. See (**2000**) herein –**Electronic ION Beam Welder**. Picture on www.cifaldi.org

1965 – Built, sold **3-gun color tubes**, by-passing **Japanese Patent for Trinitron**. Ultimately, manufactured **Trinitron** in the **U.S.**, for **Sony**, via **Olympic Radio, Long Island City, N.Y.**.

1965-- Designed a **kite-like unit**, which would be positioned (**5-10**) miles in the air, connected by a steel cable. The unit would carry an **F. M.** antenna, and associated equipment. Because **F. M.** broadcasts signals go in a straight line, (instead of bending with the curvature of the earth, (**like A. M. signals do**)). It would be extremely valuable for television signals (**F. M.**), cell phones, as well as Internet Access!

Such a system(s), network, would also be valuable for **nations**, who could **NOT** afford geostationary satellites.... much cheaper too! Several separate units spaced at the appropriate intervals from one another, would be able to provide data to **thousands of miles, in diameter**.

This system would be especially useful, for areas of the globe, which had large expanses of desert land, where **NO (F. M.)** is available. It would also be extremely useful as a **telephonic-relay station**, or as a **weather station**, or many other uses, **NOT** specifically mentioned herein!

With modifications, the **Kite-like** arrangement, (because it is **above most clouds**), could also be used to **provide electricity**, using photo-voltaic solar cells. Generally speaking, **wind-capturing-turbines** could also be used to supply electricity, throughout the whole world. It would be especially useful where **NO** electric is available, **truly fixed in Geostationary position**, **AND** for the benefit of the nation erecting same.! See **2008 Sept 23**

UPDATE: Pictured in **Discover Magazine, Oct. 2008, Page 21**, speculates **wind-turbines**, may generate tremendous amounts of electricity. That is because the **wind-velocity** at

those higher altitudes, can produce electric-generation which is many times higher, than that which could be produced at sea level.... **24 hours** per day! This is aided by the magic of the “**Double-Quadruple Principle**”, which teaches that precept! See **Example, in next paragraph.**

Example: A **6 ft** diameter, wind –generator, may generate **1 Kw** of electricity in a **20 MPH** wind. At a wind velocity of **160 MPH**, you would now generate **64 Kw’s** of electricity. Now, if you **double the diameter** of the turbines to **12 ft.** the power generated is now **256 Kw!**

If there are **(4)** Wind turbines per unit, as **theorized** in **Discover magazine**, then you would generate **1,024 Kw** per unit. Create a “**Wind-Farm**” in the sky. See www.Cifaldi.org With **(10)** units, you may now generate **5,120 Kw**, with **NO** air-pollution, nor oil-use whatsoever. Further, it is well-known that we have constant **high wind-velocities**, traversing the sky, **FOREVER (24)** hours a day. See full explanation of the **Double-Quadruple Principle** and Sky-Wind Farms in www.cifaldi.org

1964 – Designed, built, sold, **Bombarders (Low-frequency Microwave Units)**, for **heavy-metal heat treatment**. Shipped **(5)**, **50\60 cycle units** to **Italy** and France, as well as to other U.S. Corporations.

1964 – Invented, designed/built/used, equipment to fabricate **Metal Picture Tubes** (glass to metal seals), successfully, mitigating the difference of expansion ratios. Manufactured **(30)** inch round-metal **implosion-proof Radar Tubes**, **laminated**, with **special phosphor (P1)**, for the **U.S. Navy**, under special contract, with **Fairchild/Dumont**, in **New Jersey**.

1964 – Designed, built, **20-Kilocycle 2,000-Watt** (now **Kilohertz**), output, prototype **Ultrasonic Drilling-Machine**, [could **drill square holes**, as well as **other normally-unachievable hole -types**], with, for **Sheffield Corp**, a Division of **Bendix Aviation**, in **Ohio**.

1963 – Designed, (**not patented**), Hybrid Energy Car (**T.E.C. – Total Energy Car**), which utilized batteries, along with a **small gasoline engine**; **Photo-voltaic solar-cells** mounted on roof and hood, **regenerative braking**, wind- operated battery recharging, **compressed-air assist**, **reduced wind-resistance-shaped**, automobile.

NOTE: Appeared on T.V. for **(1)** hour, broadcast Nationwide. Similar vehicles being offered for sale in **California** for the year **2000**, **Washington, D.C. (2001)** and **Florida (2003)**. Such, are much like **T.E.C.**, as indicated herein, but currently still **NOT** using **Photo-voltaic Solar Cells**, **Wind-operated battery-recharging** and **Compressed-air Assist**, as envisioned in the **T.E.C.**

When interrogated by a panel of **(6)** experts, (of different disciplines), how to take my vehicle cross-country, I told them that the local Electric companies, in each state, **would**

set up poles with recharging battery capability. It would be activated by special, credit cards, (would be a whole lot cheaper to set up and maintain, than gas stations). **ITS TIME HAS COME!**

*This document, **absolutely predicts this occurrence by 2012, as more and more Hybrid Cars, (Battery & Gasoline) are built purchased.***

Fueled BY EVER HIGHER AND HIGHER OIL/GAS PRICES)! NOTE: (**FUELED**interesting CHOICE of words!

Submitted diagrams and other information to the (3) U.S. major Car companies, but was **derided** for teaching aero-dynamic shape of vehicle **WAS important**. The **NIH, (Not invented here)** syndrome, was alive and well. Their view (at that time) was “**With cars possessing 200 to 300 H.P. engines, it is ridiculous to consider lowering wind resistance“!** As at the 2,000’s, **ITS TIME HAD COME!**

1962 – Did consultant work, (pioneering), for **Perkin & Elmer, State of Connecticut**, on manufacture of **gaseous lasers**.

1961 – Built several different types of **Special Purpose Cathode Ray Tubes** including **Oscilloscope Tubes, (with Electrostatic Deflection)**, Stock Market quotation-device CRT’s, for **Bunker Ramos – Connecticut**.

1960 - Did consulting work for a business associate, who was looking to purchase and operate, a Picture Tube manufacturing plant in Kansas City, Missouri.

NOTE: As a result, after going back and forth numerous times between **New Jersey** and **Kansas City**, I was privileged and honored to have shared airplane rides with, former **President Harry S. Truman** AND **Eleanor Roosevelt**, wife of former president, **Franklin Delano Roosevelt**

Note: The **1st time**, I shared a seat with **President Truman**; he came and **sat next to me**. The **2nd time**, he was already seated **before** I was. **I chose, to sit next to him!** (NO secret servicemen in sight). [NO State secrets were discussed]!

On another occasion, I was honored to fly in **Mrs. Eleanor Roosevelt’s** company, we were seated, **face-to -face, knee-to-knee**, in a **TWA Constellation 4-engine propeller-driven** airplane. That was the seating arrangement in which there were (2), two-positioned seats, facing each other.

1960 – Attended **William Paterson College** for approximately **2 ½** years, earning some (42) credits, did **NOT finish**, earned **NO degree**.

1959 – Designed, developed and used equipment to apply **Epoxy Resins** through heated vacuum-ovens for **Electronic Transformer Incorporated**, Totowa Ave., **Paterson, N.J.**

Also used many different types of epoxies for **glass-to-glass** use, as well as optical epoxy (**see through**). Became expert in other **Epoxies** for glass to metal seals, as well as **metal-to-metal** seals.

1958 – Invented, (not patented), a **Solar cell-operated device, (activated by a flash- light)**, capable of killing sound in a T.V. set for bed-ridden son. (Forerunner of **“remote control”** today – forerunner **#2**). See forerunner **#1** herein **1955**

1957 – Set-up **(5)** Television Tube Manufacturing Plants in the **U.S.** and **(1)** in **Canada**, since... and see **1952**. (Refused lucrative **Russian** offer to do same, Cold-War Time). See article, **“TELEVISION AND REPAIR”**, in **Wikibooks**.

1957 – Designed, built, **MYSELF** a **(6)-position high-vacuum**, aluminizing machine, with exceptional characteristics, (also known as **“Sputtering”**).

1956 –Built my own T.V. Tube Test Set from parts, which tested Picture Tubes, which displayed all voltages being utilized.. It also measured the amount of gas in CRT.

Additionally, it supplied means to **de-focus** the electron beam and **disable “sweep” circuits**, thereby projecting a picture of the Cathode coating. (It displayed a round, lighted spot, [about the size of a Silver Dollar], which appeared on the T.V. screen, for analysis.

(“EXCEPT”)

IF, THERE WAS A CATHODE-RELATED PROBLEM!). It was **“read”/interpreted**, (much like a Doctor reads **“X-Rays**). **THIS** was the **Precursor to Electron-ray Gun Technology**. See **1965 herein**. Also see Author’s drawing of an **Electron gun**, on www.cifaldi.org and the explanation for **(“EXCEPT”)**, in **TTEC Book**.

This enabled anyone, skilled in the art, to **“read”** the presentation, (in conjunction with gas reading). Normally it would help to determine the life expectancy of each tube, with **99 %** accuracy. (Led to conception, successful testing, of **Electronic Beam Welding**). See **1965 & 2000** herein, precursor to **Electron-Beam, Ion-Beam Technology**.

1956 Built my own **“Square--wave“** Generator. Built my **Oscilloscope**, also **used my own personally-hand-made, Oscilloscope C.R.T.**, therein. Used many times in repairing hundreds of T.V. sets.

1956 **Designed** and **built** a special-purpose CRT, with **P-1 Phosphor, (greenish tint)**, which was capable of displaying a **1,050-line** picture , (**U H D**), **Ultra High Definition**. The **CRT** was used to be photographed from, and to be used, in conjunction with, a **High-speed, High Resolution, Film Camera**.

The resolution of this CRT was (4) times more superior, to the U.S. 525 line system, still practiced , (circa 2008). NOTE: In 2,006, the basis for its powerful use, was taken advantage of, in the formulating of Blu-ray Technology.

See Blu-ray Genesis in www.cifaldi.org and in NOTES

1955 – Took a 4-year Engineering Math course, with a personal tutor, a Professor, who was teaching at Farleigh Dickinson College, N.J. It was completed, in (1) year at (3) - (4) hour days/week, (NOT including 20 hours of homework per week).

1955 – Invented/fabricated, a “Rube Goldberg” device, for bed-ridden woman to turn on/off T.V. set and change channels, without any assistance from her family. T.V. sets at that time featured “rotary dialed on/off switches” and “barrel tuners” (which were also activated/ employed, in circular fashion.) (Forerunner #1 of “remote control” today.

See Remote Control fore-runner # 2, 1958.

1954 – Invented, designed and had built & operated, Glass Lathe, with compressed-air head. Became adept at several types of glasswork.

1954 – Became adept at repairing Glass Hi-vacuum pumps, NOT expert, but comfortable with, Glass-blowing techniques.

1954 – Experimented with Electricity-producing Solar-cells, (Photo-Voltaic) and low-wattage relays. See 1958, 1963.

1954 – Designed/built, used a (4) bed [column], see-through De-ionizer/ Demineralizer. Designed, built & used, rock, sand, activated-charcoal filters for associated water-purification equipment.

1954 Received 1st patent (patent # [unknown], (approximately 1954) Electron Gun Technology, with a 100% reliability factor. (Patent assigned to President of Company, I worked for). Designed, developed, built, many equipment improvements, as well as processing T.V. Tubes. Was nationally acknowledged, as a world leader, in TV Tube manufacturing.

1953 As a licensee of Radio Corporation of America (RCA), went to Princeton, New Jersey, and saw a live stage presentation of a musical, starring Nanette Fabray. After the musical was presented, we were treated to a color video presentation of the show on TV sets. This was to show how accurate the show was copied/recorded, rather than the Wheel-produced color system propounded/proposed by CBS!.

1953 – Hired as Chief Engineer by Claremont Tube, 5815 57th Drive, Maspeth, L.I., N.Y., (without College Engineering Degree), and then Plant Manager for a new facility, in Long Island City, N. Y.

1952 – Through 1957 set-up (5) T.V. tube manufacturing plants in the U.S. and also (1) in Canada, as consulting Engineer. This included design, installation, construction of equipment, electric power lines, gas lines, water lines, drains, siting of manufacturing equipment and training of all initial workers, for ALL operations, in manufacturing.

1951– Became Foreman in Eureka T.V. Tube, on 5thAvenue, Hawthorne, N.J. Did

pioneering work on Hi-Vacuum Mercury-diffusion pumps, using Liquid Nitrogen, (high-vacuum usage). Also worked with water-jacketed, glass-construction 3-Stage Oil-Diffusion Glass Pumps. Became expert in high-vacuum technology.

1950- Took a 10-book, correspondence course, (6 mos. duration), generally taught to the U.S. Navy personnel, regarding basic Electricity and then Electronics. It started with the structure of the Atom, then went into magnetism, electricity, followed by the rudiments of Electronics. It eventually progressed into full-fledged Electronics.

1949 – Secured a job in T.V. tube plant, (Teletube Manufacturing Company), manufacturing Picture-tubes, located on Marshall Street, Paterson, N.J., for approx. 1-1/2 years.

Became expert in Exhausting CRT's, Fire-setting to work the glass or metal, associated in all stages, of (CRT) manufacture.

1945-1947 –Joined U.S. Merchant Marines for approximately 2 years, (making 1st trip to France, {approx 45 days} in 1946, while a Senior in High school). Returned and was graduated with my class. Exempt from all final exams, (needed 90 or better marks, on report cards, for ALL periods, in senior year). Served as Business Adviser for yearbook. Served as Wiper or Fireman, on (3) different ships:

1. (Moore McCormack Liberty Ship, (brought grain to Le Havre, France);

2. Adrian Victory which transported 600 horses to Gdynia, Poland, (thru the Kiel Canal, into the Baltic Sea). Update: 1-28-2009 Saw a T.V. program on the History Channel, in which an ice-breaking ship was so technologically advanced, that it took only (5) men to safely operate it.

That brought to mind, the instance of what happened, when the Adrian Victory, first dropped anchor, some (5) miles out of the port of Gdynia, Poland, (in the Baltic Ocean). Almost the entire crew went on leave into town, when orders came in, unexpectedly, to bring the ship into port...immediately!

The Captain took the helm; the First Mate manned the deck, (up-anchor and tie-up, of the ship in port); and I handled the Engine Room, (I, a (17) year old, 6-month, sea-going veteran, (as a Wiper, NOT a Fireman). The (3) of us, brought the ship into Port, & tied up safely, without incident!

3. Ernie Pyle, C- 4 Troop-ship, brought **German** Prisoners of War **FROM** the U.S., back to Bremerhaven, Germany. Then we returned with **3,000+** **American G I's**, to **New York City**, (to a **Tumultuous Welcome**).

NOTE: Cigarettes on ship were sold at **\$.80** a carton, - (without taxes) . In **New Jersey**, in **2009**, a carton has escalated to **\$80.00**/carton. The ship was named after a noted newspaper reporter, (Ernie Pyle), who was killed in action, during **World War 2!**

1945 – Invented a Basketball play, (**“Allez-ooop”**), which ultimately, was adopted by the Pros and later Colleges, (albeit, **without their knowledge of my discovery**).

1945 – Won boxing Light Heavyweight (**175 lb**) Championship, Novice Class, in the **“Diamond Gloves”**, in **New Jersey**, (like **“Golden Gloves in New York**).

See Picture in cifaldi.org

1944 - Quit Central High School for (**1**) year. Subsequently, I resumed my education and was graduated from **St. Mary's High School, Paterson, New Jersey**, at **18 yrs** of age, in **1946**. **NOTE:** I was tested and found to have an **I.Q. of 153**, at age **17**. See **1946** graduation picture in cifaldi.org

1941 --Attended **Central High, Paterson, N.J.** for (**2**) years, **NO** remarkable grades, **except Science** – Received a mark of **“100”** on my report card, (in that subject), [**1**] marking period, while other Grades, were **merely passing**.

1940 – Designed and **used/played**, for many years, a unique football play, I named the **“5-Man Out Pass”** (precursor of the **“Shotgun”** today), [**without their knowledge of my discovery**].
See cifaldi.org

1939- Built a **Crystal Radio**, then a **Super Heterodyne (SUPER HET)**, at **11** years of age.

1933-1940 Primary education: Attended School #19, **Paterson, N.J.** till **6th** grade; old School #5, for the **7th** grade; new School #5 for the **8th** grade – tested and found to have an **I.Q. of 121** at age **13**, (without my knowledge), see **1944** herein. **Grades, less than remarkable**.

For more information about the author, SEE **cifaldi, carmine HomePage**, in **Author's Website** (www.cifaldi.org), OR in the following search-engines: **Yahoo, AltaVista, Ask, BING, Clusty, Dog Pile, Google, Lycos, lyGo, Mamma, WebCrawler, Yippy**, and many others!

Or

I can be reached, [**circa August 2009**], at: **7435** Fairlinks Court, **Sarasota, Florida, 34243** or ccifaldi@tampabay.rr.com .
