

A modern use of technology, can provide a **superior education** for the masses, and solve the Educational morass, afflicting the United States today. Go to the Website **Home Page** , of Carmine Cifaldi, at CIFALDI.ORG Klik on **FILES** then Klik on **TTEC 92 Page Update** !

©1978 **The Ideal Educational System/Two Teachers in every Classroom (TTEC)**, teaches that **ALL** Students, [in like Classes], regardless of **race, color, creed or economic circumstance**), may be taught the **SAME LESSON** (approved by the State), at the **SAME TIME**, by the **SAME TEACHER (Master Teacher)**, previously vetted by the State!

Among many, many other attributes, contained in **TTEC**, are cost-saving functions, (non-educational productive expenses), such as **Telephone/Fax** costs. **Hewlett Packard [HP]** claims a **40 %** reduction of telephonic communications, in their like-network hookup).

NOTE: **HP** may qualify that network, as a **Telephone Company**, as permitted by the **Tele-Communications Act of 1997**, as **TAUGHT** by **TTEC**. Their system will **ACTUALLY earn** money for **Hewlett Packard**, (for **ALL** incoming telephonic calls, from other networks). Basically, that would effect, even more, of a cost reduction!

See CIFALDI.ORG, for more complete details! **TTEC** also may tie into the **World Wide Web**, at **NO** additional cost. Many public school systems today (**2009**), are paying exorbitant, unnecessary amounts of money, to so do! **Ignorance of technology CAN be very costly!**

TTEC, also provides **superior security** for the both Student **AND** the Teachers! Further, it has means to protect the school and its contents, **24** hours a day. This includes **Fire/Police /Ambulance** notification, as well as successfully coping with **vandalism** problems!

Provisions in **TTEC**, are also included to **encourage** and **provide**, (**hands-on**) experience, for children as young as (**10**) years old, in relation to the Television/Tele-Communications Industry! (see **Amy Rosen, Wemrock Brook School "Pupils blend music, art, into special school show"**), compliments of **Google!**

Last, but **NOT** least, a **Chinese** company, aided and abetted by the **Chinese Government**, has recently (**2007**), installed a rudimentary system, in the **Philippines**., which is beginning to look like **TTEC!** This is a **Five Hundred Million Dollar (\$500,000,000.00)** installation of their system, which is also aimed at educating the masses.

Their system, also includes small schools, [less than (**10**) students], in remote areas of the country, which then may enjoy superior teachers, alongwith the students, in well-to-do areas, (also taught by **TTEC**).

The **Chinese** educational system can **NEVER** be as effective as the **TTEC** system, because that system, is based on **geo-stationary satellite** communication, while **TTEC** is disseminated thru **Co-axial** or **Fiber-Optic cable**. **BUT, IT IS A START!** To see **ALL** the advantages of wired Cable connections, see the main **TTEC** document on CIFALDI.ORG Klik on **FILES** Klik on **TTEC 92 Page Update ..431 KB**.
