

**Wind from the Stratosphere, will be the energy-source, for the future of Earth.**

For the rationale, (and more detail), behind this statements, go to the following links:

**Sky Wind-Farms**

<http://www.cifaldi.org/files/Sky%20Wind%20Farms%2010-21-2008.pdf>

With an inexhaustible supply of electricity, water may be desalinated and piped in, where there is too little , and or create large fresh-water lakes. Earth's science, using electricity, may make **(synthesize)** ALL the water Earth needs thereafter!

**Note:** Man can **NO** longer count on **Uranium**-produced Atomic Energy, because, IT TOO, is a **FINITE RESOURCE!** At the **2009** rate of use, there is only enough **Uranium** to last, **LESS THAN (150)** years! Worse yet, oil-reserves, (at about the same time), will be close to being being depleted, (becoming a memory)!
