Bible Code Origination

Examination of a Hebrew Tale

This is a non-theological, non-HEBREW examination, of ALL 39 books, of the Hebrew Bible, (Christian Old Testament (almost). This examination of the Hebrew Bible, is by an Electronic Engineer, who holds 3 Technical Patents. who was also a trained, practicing, criminal investigator for 17 years,

The 1st, is a design of a Cathode Ray Tube Electron Gun (circa 1949). Patent number unknown, patented by my employer, at that time .

The 2nd is for a HIGH RESOLUTION OPTICAL COMMUNICATION SYSTEM, (circa 1997), a 2,000+ line Cathode Ray Tube, Fiber-Optic Telephone System … (Patent # 5,703,636).

The 3rd, (Circa 2001), is for a Hybrid Solar Heating System, with extended heat-storage capability. It was specifically designed for home- heating, factory/office buildings, hot water needs, and other hot- water /hot- air applications, despite long, sunless, periods of time,….. Patent # 6,372,978 B1.

The data obtained herein, based upon intensive investigation, interrogation, using State-of-the-Art P.C.'s , has convinced this writer that there is indeed coded information in ALL 39 books of the Hebrew Bible.

To properly understand what you will read in this paper, you have NO need for a theological background, nor belief in any religion. Further there would be NO need for any special technical training, NOR any knowledge of the Hebrew language/customs or beliefs.

 The only requirement for reading/understanding is good old-fashion common sense. Having said all this, remember... you have to take nothing on faith. Everything revealed in this paper, has been fully documented (*except my opinions*)

Most Hebrew Bible Code investigators limit their research to the first 5 books of their 39 book Bible (referred to as the TORAH…. spelled as Hebrew -translated TORH). The 5 Books are named: Genesis; Exodus; Leviticus; Numbers; Deuteronomy. Both Hebrews and Christians believe that these 5 books were dictated to Moses, by God. Therefore, these are the only books that contain information, beyond the readable religious content obviously written therein.

* I believe, after years of investigation, that ALL 39 books, contain the word of GOD/JESUS CHRIST/ HOLY SPIRIT, because they are written by the prophets, who, like Moses, recorded faithfully, what the LORD wanted to be revealed.

Many extremely educated people, experts in Theology, believe there is NO hidden code in the Bible. They contend, there is no code needed, as the words obviously speak for themselves.

Still others believe that so many people, contributed to the content, and that, besides the enormous time lag, the translation into different languages, by many unskilled theologian/reproducers/copiers may have made so many mistakes, that any code, which might have been contained therein, has been interrupted/ corrupted. Therefore, any research for hidden codes CANNOT be taken seriously because, the database is insecure.

I fee1/believe that, NO MAN CAN CHANGE THE WILL OF GOD. I believe that the Law of Entropy,(things going from an orderly state, which can only get worse, and cannot be self-corrected), does NOT/CANNOT, apply to the will/word of God.

For example: when you drop a teacup on the ground, and it breaks up into pieces, it cannot, all by itself, reassemble and become a whole teacup again. This is a small example of the meaning of the word "entropy". Basically the worse it gets - it can only get even more worse and never back to its original, orderly state.

*Further, I believe that mistakes made by one person, writing/ copying/ transcribing/transliterating (translating from one language to another), will be/ ARE, RE-CORRECTED by mistakes other persons make, from generation to generation… recopying/re-translating.

However, there are built-in corrective actions, enjoyed every single day by many people in the world, such as: data/music/ weather reports from your favorite A M radio station. It has an ANTI-ENTROPY [A E], electronic system wired in. This A E system is named A G C (automatic gain control). This circuitry automatically keeps the signal at a pre-determined signal strength, (your choice), dependent on how loud, YOU … TURN THE VOLUME UP… OR…. DOWN).

When the signal is weak, it strengthens it - where the signal is too strong, it weakens it. Thus, with no action required from you/anyone, the volume remains constant ….. where you want it! Therefore A G C, would be considered a kind of an…. [A E]…. anti -entropy system!

Ditto for F M - operated devices (radio/television). Except, for technical reasons, not necessary for understanding here, the A E control is named, A V C (Automatic Volume Control).

Again, this A E through A V C, adds to your pleasure in keeping the sound level controlled, EXCEPT during commercials. But even then, you can use your own A E control, the remote, which can lower or raise the sound level, or mute it altogether.

One more example of an A E system, is the method in which your furnace/hot water tank keeps the heat and/or the hot water ready to serve you on instant demand. That A E device, employed there, is called a Thermocouple.

The Thermocouple operates by what is called the Piezo-Electric Effect, {2 different metals, joined together, which develop small electrical currents when heated}. These minute electrical charges are recognized by an electrical relay, which then causes a valve, controlling access to a gas supply, to allow your gas burner to be re-ignited.

The benefit here is - that IF the pilot light is NOT lit, - then NO electricity can be generated, therefore NO gas will be released, to be lighted. If the pilot light goes out, instead of gas filling up your home, you get NO heat NOR hot-water ! This explains why, from time to time, you may have NO hot water or heat.

 The heating system, in your home, because of that A E device, [Thermocouple], automatically and efficiently protects you, even when there is a failure of key parts, which could otherwise become catastrophic.

The reasoning behind citing all these examples is as follows: You may NOT know that there are many factors in daily life, of which we are unaware, that make our lives richer/safer/more pleasant, but they are there …. Despite the explanations given herein, you may still NOT fully comprehend how they really work - but who cares? - as long as they DO work - and keep working.

Now, if technology developed by man, could counter the effects of entropy, why is it difficult to believe that a superior intelligence, would/did provide an A E system in data he would want left exactly as he caused it to be written. Do we have to know how it works? We, in full confidence, turn up/down, heating/cooling controls,….. because experience has taught us, they DO work, and they may … be… RELIED… upon.

NOTE: You do NOT have to know how everything works. For instance, Man was using electricity for many years, without really knowing how it worked - but it did. Experience has taught us … flick the light switch … the light comes on ! Turn on the TV, … the television lights up and we watch our favorite programs… and… even some commercials ! One more time … and then… onward.

Why could **NOT** a <u>Superior intellect</u> have provided an a system, in a series of documents, authored/written/copied/translated/transliterated, thousands of years ago, to keep **HIS** message constant, [the **LORD'S** own **A E** control] ? It would also which provide data/warnings/information about people/places/things, living in countries, not even dreamed about, 2000 years ago ?

Then, having such odd names as AIDS; KENNEDY; ROOSEVELT;   MURRAH BUILDING ; LA ;   HIROSHIMA ; AUM SHINRIKYO; SCUD MISSILES; World Trade Center : ETC., accurately reveals/displays, well-known information, (after the fact) about them all.

 *The way I view it is as follows: The superior intellect/God? . .. (whoever/what ever), disregarding the argument of the origin of life, selected, from all the people living, at some time, a mono-theistic , (belief in one god), people. Gave these people a language, without vowels, WHICH automatically created words, 2 or 3 letters shorter than in the English language.

The average word length in the Hebrew bible is exactly **3.926845** letters (rounded up to (4) letters per word)… Select people …(prophets ?)… who would put into writing, his laws, his thoughts - (on a human level).

Have someone say that all these separate documents belong in one book, (**1,196,922** letters) and have them all put together as one book, Give these people the power to conclude that indeed, the words written by all these different people, are the word/will of the creator of the Bible.

Provide them with inexplicable, non-human happening/events, (**MIRACLES),** from time to time. Have the ecclesiastical words give birth to subcode words, which contain information, (**or for reasons known to Him alone),** which will help guide people, in the direction **HE wishes them to go**. This, **without interfering** with the religious tenets, he wants the people to observe,…... live their lives.

In this way, he could pay attention to each/ every person, on an individual basis, as, to whenever, they are born, for his own reasons, (which I do **NOT** presume to know). Needless to say, if this is true, (which I believe), no one of human intelligence, could create a document like the **"Hebrew tale",** **(Hebrew Bible),** the Jews revere. We still do **NOT** know yet, [chances are, we **NEVER** will], the intent of the real meaning, the author(s)/creator?, had, having this document written/published/distributed. Further, having the Ecclesiastical words, reveal coded information, with… **NO**… diminution of liturgical content/value. This information, lay waiting, to be discovered/made known/disseminated, in the age of the computer.

HE made it possible by (among other things), that the Hebrew language was in fact a code, but accepted and learned as a language. As a beacon to aid in religious thinking, was achieved by putting in code, an important word, which could be found, …without …the aid of a computer. This would then open up the door, in a quest for other information,…as follows:

A Rabbi discovered there was a code in the liturgical wording of the Torah, which co-existed with the liturgical content, [at an "equidistant letter sequence"], that NOT only did NOT change, (1) word or (1) letter, but was based on the tenet that if (1) letter was missing or added, or even out of place liturgically, the Code remaining in the Bible, would be severely hampered, if NOT destroyed.

Although some of the greatest minds, ever created/born, suspected that this would be the case. Rabbi Weissmandel, was the first human being, born on earth, that found something WAS indeed coded into the Bible. He may or may NOT have realized that this was the great-est discovery in the whole world ever made, about anything! (Except, for the Bible itself).

In my scientific analysis, THIS IS HOW HE ACCOMPLISHED IT !

He started a search for the word "TORAH", which in Hebrew is spelled T O R H. (Hebrew spelling …… Tav; Vav; Resh; Heh). This search was to be done, WITHOUT a computer or other mathematical tool, so the first ELS spelling of Torah had to be discovered early in the first book. If NOT, chances are the Rabbi, would NOT have been the first to discover a code hidden in the Hebrew Bible. The selection of the 1st test word "TORAH", was a natural selection, because it was among the most important words, in the Bible. This coupled with the fact that the first letter of TORAH [T] started with the 6th letter of the whole (BIBLE)Book. This was fortuitous… OR WAS IT ?

The 6th letter of the whole 1,196,922 document is a T "Tav". So, he tested it as the 1st letter of a possible spelling, at different ELS positions. The Rabbi found, that there were 6 - letter 0' s "Vav", following the 1st Tav. The 2nd of which, was situated at an ELS of 50. He continued from there and counted 50 more letters to find the 3rd letter a… "Resh". Again, he counted 50 more letters and thereby found the 4th letter,… the "Heh". He did this using a series of meticulously hand-written cards, [without the aid of a computer[.

Since the Rabbi found the word Torah, at an ELS of 50, in GENESIS, he probably figured that might/might have NOT been, an accident. He then tried to find the ELS 50 Torah in the next book EXODUS. [at the same 50 ELS]……. Looking in Exodus, he found the 1st (Tav) therein, which was the 8th letter of the 1st verse, of the 1st Chapter, {again a fortuitous finding}.

There were 6 - O's (Vavs)… following that 1st (Tav),… but they were really of no consequence, because he was looking for the (Vav) - 50 letters further on, if there was one! There was one … Then he found the (Resh), again at 50 ELS,… and finally the (Heh) at 50 ELS. Then he became more than suspicious, and probably, a little excited! So………

On to the next book… LEVITICUS … Now the trouble began, and his persistence and beliefs were severely tested. He had to go all the way from the 1st (Tav), [the 18th letter of the 2nd Verse of the 1st chapter], to the… 28th… letter of the.. 30th.. verse of Chapter 4.

This required him to test an enormous amount of (Tavs), which might have an ELS of 50, to be followed by a (Vav) at an ELS of 50, … if there were any. Then at that point, he again counted 50 letters further, to find the (Resh). Finally and again he counted another 50 letters, to find the (Heh). It was there…. On to NUMBERS

Numbers, was NOT too bad. He had only to go to… Chapter 1, …Verse 51 .., to find the 1st ELS 50 (Tav). After that, … find the (Vav) at + 50 letters,… then counted 50 letters, each, …. for the (Resh) … and the Heh. Having accomplished that,…. he turned his attention to …..

DUETERONOMY. The 1st ELS 50 (Tav) therein, was found in Chapter 1 Verse 42. Then + 50 was the (Vav). Then again + 50,… yet again, a (Resh),.. + 50 again , once more, he found the (Heh).

I was surprised, to find many experts say, that the five books did NOT contain ELS 50 Torahs. My research has determined that all 5 books… DO … contain ELS 50 Torahs ! That immediately tells me that they have NOT used the Computronics Bible Code Program. See later herein….. and see …my paper titled " 32 ELS Torahs in 1st 5 Books etc….. (Total of 74…. in all 39 books).

Most people today believe that God gave man the 10 Commandments, thru Moses. Many people believe that God spoke to, and through, the Prophets. I wonder, how many people, besides myself, realize/believe that, Rabbi Weissmandel was inspired by God, to find out this Universe-shattering fact.

AFTER ALL,… WHAT GOOD IS IT, …..IF YOU HAVE A CODE,…. WHICH NO ONE COULD READ…..OR ….. DECIPHER?

First, have someone "break ground," and start the ball rolling. To get more people and more learned minds, in the hunt, to find further evidence, which started in earnest with the following:

Discover, and put to use -electricity. Have someone else invent the transistor … printed circuits …. computers. Have yet another person/group of people, design a program, which could be used by anyone, to investigate/interrogate the Hebrew Bible. This would be in any way … manner or… fashion that, that, that person alone wishes to do, for whatever reason that person wants …. with no one to answer to.

Moeover, I believe that any good programmer might be able to design a program which can include any key code (name) to be found, but I would be at a loss to figure out how information relative to any key code, could show remarkable parts of that person's life, things, known only to yourself, which are therefore found, after the fact. This applies to thousands/?, tens of millions of key codes,   each… in its own ELS matrix.

Further, how could the positions in the matrix, especially the sharing of letters, for related found facts, be provided for?   Case in point John F Kennedy Jr. For example(s): mother/Jackie; Uncle/Ted; Father/president; Airplane/Water/ death; Born/1966 (Wife); 2 related words, not printed here on purpose, plus approximately 8 others, or more.

*Finally, aside from countless other factors, some of which will appear herein, I find many, many things in the Hebrew tale (their Bible) extremely compelling. The computer-elicited data, for every key code examined to date, (approximately …350) contained an almost equal amount of findings, reading from left to right, English Mode, (EM) and then again from right to left Hebrew Mode,(HM). Since means are provided to pinpoint each and every letter from 1 to 1,196,922 (the number of letters totaled in all 39 books),… NOTE: I have never found (1) case, where the same letters have been employed both ways.

The next most important aspect of my research into the codes appearing in all 39 books, is the finding of subcode (words found related to the main code [Key Code) in Equidistant Letter Sequence (ELS) in Horizontal/Vertical/Diagonal planes). ELS is defined, as letters which are found spaced apart, in some orderly progression, under the following circumstances:

 Arrange the total amount of letters contained in all 39 books (1,196,922) in one single horizontal string of letters, with no punctuation marks, in contiguous fashion (each letter next to the other….with no space between letters).

Give each and every letter its own number, with the first letter, of all 39 books being called Letter # 1. The very next letter is, of course, designated as letter #2.

The following letter is then named Letter #3, etc...the very last letter in the 39th book is therefore called, Letter # 1,196,922.

Let us find the letter numbers for the word "Torah", with all letters located in Genesis... 1st chapter, ...1st verse, ...of the... 1st book, { as the Rabbi did } !.

The 1st letter T..... (Hebrew letter Tav) ...... is located as letter #6.
The 2nd letter 0.... (Hebrew letter Vav),..... is located as letter # 56.
The 3rd letter R.... (Hebrew letter Resh).... is located as letter # 106
The 4th letter H..... (Hebrew letter Heh).... is located as letter # 156.

With the aid of the computer, I have discovered 6 ELS Torahs in Genesis alone. In the first 5 books, I have located 74- ELS 50 Torahs. There were 34 ELS Torahs reading from left to right, and 40 ELS Torahs reading from right to left (The direction Hebrews read/write). ELS 50 Torahs were located in 23 of the 39 books. Let us now finish up my documented findings for all ELS Torahs in all 39 books. There are 53,609 - ELS Torahs in Genesis alone. ....The total Torah spellings of... all ELS findings... in all... 39 books is an astounding.. *5,731, 901.

 The highest possible ELS search for a 4-letter key code word is an ELS of 299,305. This is derived from the total pool of 1,196,922 letters. Unfortunately the Computronic Bible Code Program will only allow searches up to, but not exceeding 100,000 ELS. Therefore Total ELS findings, in reality, tremendously exceed the * 5,731,901 times, I was able to discover.

 These ELS sub-codes may be drawn from letters visible only in the T.V. screen. If you don't see the COMPLETE word, it will not be displayed or revealed. Further it must be in an ELS straight line/mode, albeit in Vertical, Horizontal, or Diagonal formation.

Once you have discovered your Key Code, your data base has shrunk, from the usage of 1,196,922 letters to 3,600 letters. But, those 3600 letters are only used to form a matrix which serve as a repository for relevant found subcodes.

"Torah", as a Key Code, could have an ELS as high as 299,305,... but.... as a subcode, in a 90 Column matrix, it can never have an ELS higher than 22,.... also, as a 4-letter word in a 60 column matrix, the ELS now, could NOT exceed 15.

 In JESUS CHRIST (9-letter) ELS 5771, if the word "BETHLEHEM" ended in column #91. Then in that case "Bethlehem "could NO longer be found because the last letter is one column number higher than is available, in the T.V. screen. The highest ELS for Bethlehem, a 6 letter word, is 15. Any subcode which starts or ends outside the visible T.V. screen matrix, will NOT be able to seen/used .

How ever, because of the way the computer program is constructed, the word pool reduced to 3600 letters is NOT really accurate. In many cases, the actual subcode words have far fewer liturgical-derived letters available for their formation, as described later, in this document. * * *

In the Vertical ELS mode, a 6 letter ELS word, scales down, to the use of 540 letters (approx 135 words). But, you only have a pool of 90 words (360 letters) of liturgical letters, for a 4-letter subcode word. Diagonally-formed subcode words follow the same rules as vertically-formed subcode words.

In a Horizontal ELS mode, the subcode pool of letters is further restricted to only 90 letters (in a 90 column matrix), from 2 to 4 lines of actual scripture, as written in the Bible,…. or 60 letters (15 words) in a 60 column matrix. However, if 2 or more subcode words, reside in the same row of the matrix, hereinafter disclosed, all of those subcode words would share the same 22 word (90 letter) pool, of liturgical letters.

Research continued after publication of this written "Hebrew Tale", has disclosed that in…. all 1,196,922 letters….. of the Hebrew Bible, there is NOT (1) contiguous, stand-alone 3-letter spelling of Jesus. This , in turn is extremely exacerbated by a diminution of letter/word pool. This convincingly refutes the theory, that in any document of lengthy origin, ANY WORD CAN BE FOUND!. Expert theologians are worse off than the mathematicians. This is why naysayers of the code's validity, are as far off -base, as the earth to the moon.

The ELS 50 Torahs, that the Rabbi found, by hand, and I found, by computer, in concurrence with the Rabbi's hand-found one, had, in fact, verified the Rabbi's claims. President Reagan said it bluntly, if not elegantly- "TRUST, BUT VERIFY" !

Permutations of the data base, allows for quintillions.. .. (1) followed by 18 zeros (1,000,000,000,000,000,000) or even higher, of pieces of information, which potentially exists (Key Codes), therein. .. Talk about an inter-active data base !

How about one created several thousand years ago, by whom ever was responsible for authoring the entire "Hebrew Tale" - Moses and 34 other people (prophets)? Who caused it to be written? Who decided all those separately-written books, were really meant to be all part of one book?

How do you go about authoring a computer program, without a computer, before the computer was invented or even named? Everyone knows the story of Moses, but why did the Hebrews include the other 34 books as part of their Bible. According to the Genius of Vilna, a Hebrew sage, the Torah, as dictated by God to Moses, some 3,200 years ago, contained every single happening of every single

person/entity, from birth to death, from creation, till the end of time, (for every person who was.....is.....ever....will be).

  Many people are so imbued with their knowledge, of mathematical formulae…. Ecclesiastical expertness,… or their own self-aggrandizement, that they honestly do not know they are making stupid claims, or outrageous statements, about the falsity of the code and the methodology used to create the codes, and therefore disputation of information adduced therefrom.

The coding of the liturgical word is so ingenious that, I wouldn't be surprised, if there was even a second level of coding information, emanating from the primary-coded message (liturgical), in the Hebrew Bible.

At this juncture, I would like people to understand what is really involved in finding codes..- what you CAN do and what you can NOT do. Some of the "can NOT do's," occur, as I mentioned briefly before, are because of constraints built into the program by the programmers' instructions/coding.

 I suspect that one of the reasons, originally, why little actual research was done, was because of the slow speed of the computers, [circa 1990], years ago.

Some information I have discovered in May 2001, in minutes, would have taken hours to do in May 1990. Most people would not sit that long, waiting for an answer to one question, thereby discouraging research.

In 2001, I owned a State-of - the -art computer, which ran at 400 MG Hz , but a later computer, operating at 800 Mega Hertz, (apparently 2 times faster) was found to be, (on checking/duplicating certain operations I performed with the 400 Mega Hertz computer), four (4) times as fast.

 I found to my surprise, that what took 8 minutes with the 400 MHz, only took 2 minutes with the 800 Mhz. That lead me to believe that a double/quadruple principal, (when you double something, a related action has 4 times the expected effect), … was/is… in action.

EXAMPLE: When you have a pump which supplies 100 gallons a minute of water, through a (1) inch pipeline, that, when you use a (2) inch pipeline, you now are able to supply 400 gallons per minute of water instead of 200 gallons a minute. That is because of the effect of the double-quadruple law.

 As computers become more powerful,.. less constraints will be programmed in, and more information will be able to be discovered… in much less time, thereby encouraging more people to conduct investigations…. which in turn, will

encourage the programmers to make even more powerful programs, coupled with the ever-increasing capability, speed of computers, again which in turn, will encourage yet even more people to begin research, (A WIN/WIN SITUATION).

When a subcode word is found in the vertical plane, and in contiguous mode (with NO ELS spacing- although technically it is considered to have an ELS of 1), I feel that this is a very powerful demonstration of purposeful coding. When the vertical array of the found subcode is part of,/touches/crosses the key code, it is indeed, a very powerful display, which could be imaginable.

ALL Key Codes, are ALWAYS selected from a pool of 1,196,922 letters, while ALL subcodes, [when formed in a 90 x 40 letter matrix], are drawn, initially, from several lines of actual Bible liturgy. Depending on your choice, of possible KEY CODES, in searching for subcodes, [depending on positioning], words may be selected from 270 letters, 90 letters, (in a 90 column Matrix), or down to, as little as 60 letters, [{in a 60 column matrix}.

This is dependent on whether the subcode is in the vertical/diagonal or horizontal ELS mode. This selection, amongst many possible KEY-CODES, may reduce the starting point of the KEY-CODE Matrix, to be FAR LESS than 3600 letters. NOTE: Whatever Matrix size is chosen, for any single interrogation, you can NOT change the formation of the Matrix, for ALL searches, relevant to THAT (1) Key Code!

Every Key Code found, is placed in a contiguous vertical plane, some where in the middle of the Matrix (crossword-like), because of programming instructions. But, the subcodes are never forced, to be deposited, in ANY direction.

The only way a contiguous vertical array of letters could of a relevant sub-code, be displayed, is, if they are revealed in the exact same ELS, [or multiple thereof], as the Key Code. It is further constrained to be formed, in the case of a 4-letter word, to a maximum skip of 10 ELS, (in a 90 x 40 row Matrix). A 5-letter word, would have a maximum skip of 8 ELS. This, I have seen thousands of times before.

There can be no doubt that the ELS skip of the Key Code has carried these words/letters, along with themselves, and were put in that vertical arrangement to be found with the Key Code ! !   I consider ALL words found, in vertical array, as HAVING BEEN SUMMONED, by the KeyCode selection!

While the Matrix may be moved left or right, and even up and down, until you select one final position, the vertically-arranged letters/words can NEVER ever be lost- unless the first letter of a word starts or ends in Row 1 or Row 2, and you opted to use only Rows 3 to Row 42 in your "snapshot" Matrix.

Once you have frozen the Matrix, it may never be moved. even (1) Row or (1) Column, for any investigations or searches for related subcode words. <u>Moving the matrix to find other words, is</u> NOT <u>permitted!</u> YOU would be changing the message.

"WHAT GOOD IS IT, IF YOU GAIN THE WHOLE WORLD, BUT LOSE THE KINGDOM OF HEAVEN"?

Message for non-believers, NON RELIGIOUS PEOPLE, that there can NOT be a code in the Hebrew Bible (from 3,000 years ago), or anywhere else, take another look!

YOU MUST READ AND UNDERSTAND HOW SUBCODES ARE FORMULATED, BEFORE YOU MAY INTELLIGENTLY ASSESS THE VERACITY, or lack thereof , of ANY alleged Code ... or ... NOT !

And for those of you who question the presence or lack of any meaningful information, because the mathematics does NOT support it... who are you ? ... to judge the maker.... or any creator... of any code,.... based strictly on YOUR interpretation, of any math or doctrine, you espouse ? ... Shouldn't the results speak louder, than speculations?

<u>Aerodynamics proves that the bumblebee cannot fly</u>. The scientists have to live with that!

<u>The Earth is the center of the Universe</u>! Mea culpa, for the religious community!

How can meaningful information, about any key code, be derived from a pool of only 90 words of actual scripture ?, in many different Matrices....thousands of times, ... millions of times? What are the mathematical odds relative thereto?

Now, mathematical experts, and/or other detractors of the code who have NOT run the program, may now understand, that subcodes, come from an extremely SMALL pool of letters. Further, those letters are from actual scripture. What kind of math would be necessary, to explain the proven data, as written, herein ?

For people who can read Hebrew, each and every line of every matrix, is composed of (2) to (4) sentences of actual scripture. The beginning letter of every sentence, in every row of the frozen Matrix, is located, [the skip number], (ELS of the Key Code), away from the sentence above it, or below it, as the case may be.

In the case of Jesus Christ (9-letter) 5771 ELS, each row of scripture sentences, starts at exactly 5771 letter numbers, than the (1) either ....above... or.... below... itself. This is easily attained....because of the fact, that every letter of scripture,

has been assigned its own letter…. forever…, the same letters,.. regardless of any subject.

In the Vertical, non-contiguous mode, subcode words are derived from multiples of the Key-Code. These of course, are inserted into the rigid ELS 5771 matrix… 40 (Rows) divided by (4) [1, 2, & 3 letter subcode words excluded], larger letter-containing words, thereby, must be less than 10 ELS).

Once again, subcodes are … never … forced…. into any plane and each letter of the subcode is derived from a pool of 3,600 letters… or (90) … or (60) letters, as the case would apply. Repeating: Every line… of every column…. in the matrix is formed, by a pool of letters, derived from (2) to (4) sentences of actual scripture.

When in Horizontal modes, such limits each letter of every subcode word, to be derived from a different set of 90 letters of actual scripture, 5,771 letters away, in the matrix … directly, ….as written from within, the Bible.

While the key code has ALL 1,196,922 letters to choose from, the horizontally-formed sub codes, have only a infinitely smaller pool of letters, (90 letters], derived from liturgy. Then, these letters are deposited in the matrix to form code-related words (subcodes).

DOING the math- 1,196,922 letters breaks into 5,771 columns and 207 rows. Since the snapshot matrix is only 90 columns by 40 rows, words ending/starting in column 91, NOR in row 41, are candidates for non-discovery.

This, in turn says, that you may investigate only 19 % of rows available, and only one (1) of 64 Columns, disregarding myriad combinations thereof.   Additionally, in Jesus Christ (9 letter spelling) ELS 5771, there are (3) more, 9- letter spellings. There are yet 37 other Jesus Christ (8 letter spellings), waiting to be investigated, with all those combinations.

Therefore, when words are formed in vertical fashion in the matrix, they MUST be the same ELS as the Key code .. or multiple thereof, and when these words touch or share a letter with the key code, time, after time, after time, the ONLY logical conclusion is, that this was purposely orchestrated.

 Further elaboration, shows that in the formed 90 x 40 matrix, each of (2) to (4) sentences, (in the case of ELS 5771), originate, 5, 771 letters later than the (2) to (4) sentences of liturgy from which…. the 1st discovered letter…. originated.

In the case of Key Code, Jesus Christ (9 letter), 5771 ELS:

The **1st letter** would come from (2) to (4) lines of actual liturgy situated in Chapter 1,Verse 1, of the Book of Proverbs

The **2nd letter** would come from (2) to (4) lines of actual liturgy situated in Chapter 21, Verse 8, of the Book of Proverbs.

The **3rd letter** of the formed word in the matrix would come from (2) to (4) lines of actual liturgy from Chapter 27, verse 20 of the Book of Proverbs.

The **4th letter** must come, under the same circumstances, from another pool of 90 letters from Chapter 2, Verse 11, from the Book of Job.

 The **5th letter** comes from (2) to (4) lines of scripture drawn, starting at Chapter 10, Verse 12, from the book of Job.

 The **6th letter** comes from (2) to (4) lines of scripture starting in Chapter 19, Verse from the Book of Job.

The **7th letter** comes from (2) to (4) lines of scripture starting at Chapter 28, Verse 3, from the Book of Job.

The **8th letter** comes from (2) to (4) lines of scripture starting at Chapter 34, Verse 23 from the Book of Job.

The **9th letter** comes from (2) to (4) lines of scripture starting at Chapter 41, Verse 19, from the book of Job.

THE EXACT WORD AND LETTER POSITION # of each letter used is also known, (available on request).

The Matrix drawn, effectively **discards** 1,195,642 letters,…. (out of 1,196,922 letters), from consideration/interrogation. The powerful code-appearing effect, is that, the **Key Codes** letters (words), are originally selected from the main pool of liturgical words (1,196,922 letters), and then is presented in Matrix form. Thereafter the pool of letters, available for discovery of **ANY** subcodes, in **ELS**-fashion **ONLY,** is thereby reduced to a total of exactly **3,600 letters** … or approx. 900 liturgically-supplied words.

Technically, a **Horizontally-formed word** (of any **ELS),** in the 3600 letter Matrix, has approx (22) words to work with, [exactly 90 letters], in seeking subcodes.

NOTE: Many times, subcodes (words), may/can/do, partially, or fully overlap, other subcodes. For a significant, and small list of some important (words) subcodes effectuating same…see my paper entitled **"A Few words and Phrases Containing (Ayin/Vav/Shin)"**

A **"SNAPSHOT"** Matrix, refers to a Matrix which is **frozen in place,** and should **NOT** be moved, while searching for relevant subcodes, in **any** Key Code name/ word investigation.

Contiguous vertical sub-codes, are always likewise selected, each letter, 5,771 letters away from each other, embedded in 2 to 4 lines of actual scripture, but having the ELS of zero, (0), (also called **contiguous**), in the **Snapshot Matrix,** as in the case we are discussing.

Remember, when… **contiguous**…. subcodes…. appear in vertical form, that means that, they have exactly the **same identical skip code,** all by themselves, as the Key Code does. They then, **MUST** appear in the **Snapshot Matrix** to be discovered. However, if you don't seek that word, it **may not reveal itself to you** …**unbidden !**

Not only has a subcode been derived from the same **Equidistant Skip Letter (ELS)** as the main code, but the subcode, relating… to a known fact, has been carried along with it. There can be **NO mistake**, that this is **done purposely**. When in fact, the contiguous vertical subcode is attached to a part of, the Key (main)Code, or even adjacent to, the **Key Code.**

At that point, **the lower the skip** of the subcode word, and/or the closer the word is, to the Key Code, then, the **more powerful the message/intent.** The **Jesus Christ** (**ELS** 5771) matrix, depicts a key code whose 9 vertically-formed letters are each 5, 771 letters away from the letter preceding or following it…. **(Vertically).**

Repeating: To complete the astounding effect of meaningful intent, such is thereby magnified many times over, when the subcode touches/crosses/abuts the main code, and/or the **most powerful of all,** **shares a letter with the key code** .

Examples: **All** of the following, are in the **Horizontal** , in the **same frozen matrix,** Jesus Christ 9-letter spelling (ELS 5771) w/ an ELS of 0 (unless indicated otherwise (**ELS** of "0".. =s **Contiguously- formed**)… **NO spaces between letters**

"Alleluia", (2) of them… (6 letter words) (ELS 0), **1st** shares a letter **(Heh)** with **"Torah"** (ELS 2).

The **2nd** **Alleluia** shares a letter (Heh) with… **Altar,** and the word **Praise,** which is vertically contiguous, is immediately adjacent.

Although the (2) spellings are contiguously attached in the Matrix, the first spelling comes from (1st) Chapter in the Hebrew Bible, (1st from - Psalms, Ch 148, Verse 14, 11th Word), while the 2nd Alleluia comes from the next Chapter, (Psalms, Chapter 149, Verse 1, Word 1) .

"Altar" (ELS 2) shares a letter (Heh) w/ 2nd contiguous horiz. Alleluia (ELS 0).

"Ascending" (ELS 0) diagonally-formed, shares a letter (Heh),.. (6th Letter) of Key Code Jesus Christ … paralleling…. and… abutting…. "Mary" (ELS 0).

"Infallible" (ELS 6) crosses Jesus Christ AND shares a letter (Yod)… with Jesus; and a   (Yod)… with Righteous; and at another location (ELS 2) shares a (Mem)… with Mary and a (Yod)… with Christ .

"Israel" (ELS 0) shares a letter (Yod)… with "Wine" (ELS 0)….as an Heh w/ Alleluia

"Body" (ELS 0) crosses Jesus Christ

"Mary" (ELS 0), There are many spellings of but one of them, …in the diagonal,.. shares a letter (Mem), with Key Code ….Christ, of Jesus Christ !

"Messiah" (ELS 0) diagonally crosses Christ (Key Code) and shares a letter (Yod) with Christ and also shares a letter (Shin) with Trinity (ELS 0) .

"Trinity" (ELS 0) in a Diagonal mode shares a letter (Shin), with Key Code- Christ (of Jesus Christ), shares a (Heh) with diagonal Advent (ELS 0) ; Another placement of "Trinity" (ELS 7), shares a (Lamed) with Infallible (ELS 0) …. in the diagonal.

 "Rabbi" shares 2 letters Resh & Cav, w/ Lightning.

"Rejoice" (ELS 4)….Vertically overlays Jesus Christ, and shares a letter (Vav)… with Jesus , & shares a letter…(Shin)… with …Christ/(Messiah), …2nd of 4 found w/ ELS 4, Horizontally crosses Key code, & shares a letter (Shin), with Jesus (Key Code);

"Righteous" (ELS 0 There is only 1 spelling, horizontally contiguous, but it shares a letter (Yod), with the Key Code Jesus Christ,… AND…. it forms a perfect cross… with the Key Code name … Jesus,…. of Jesus Christ (Messiah),..and the…. (Yod) of Righteous, also…. shares…. the (Yod)…. of "Infallible", …alongwith Jesus.

"Soul" (ELS 5) crosses Jesus Christ…

"Blood" (ELS 0) shares a letter (Mem) with **"Soul".**

"Torah" (ELS 4) in Diagonal mode, shares a Heh w/ **"Trinity "** (ELS 0)....

"Torah" (ELS 7) Diagonally crosses Key Code **Jesus Christ**, and shares a Vav with **Jesus** .... and..... also shares a letter (Heh), with **Alleluia .**

The **FOLLOWING SUBCODES ALL BEAR A COMMON BOND:**

They **all** exist in the Jesus Christ 5771 ELS matrix, on Line 4.... in Contiguous form.... (contiguous, except.., where indicated.... **but** multiple skip, of Key Code).

Alleluia... twice (ELS 0); **Israel** (ELS 0); **Wine** (ELS 0); **Day**... twice (ELS 0);

Rabbi (ELS 0); 2 inverted letters of Rabbi +a Kuf now spells **Lightning** (ELS 0);

Water (ELS 0); **Soldier** (ELS 1); **Death** (ELS 0); **Exalt** (ELS 1); **Earth** (ELS 0);

These are all **contiguous**.... and horizontally-placed in the matrix, on Row # 4 , All share the same pool of 90 letters (approx 22 words of actual scripture), and all **ONLY** in **ELS compliance.** Take note of all the tiny **ELS #s,** and the minute word pools, used to discover all the foregoing **ELS-compliant,** relevant, subcodes. **Note** their positions found, as well as, **the sharing of letters with each other.**

So as not to make this document too unreadable, I will refrain from citing many, many instances of words/subcodes ...**interacting, with relevance** to the **Key Code** and/or each other. But, such information will be available in another document, I have authored.

Including those words, all told, there are currently (and still counting), 320 relevant words, in the Jesus Christ 9-letter **ELS** 5,771 Matrix, with no **ELS** subcodes larger then (10). The most important ones, having **ELS's** of Zero (0) to (2), while the others having....**ELS's** from (3) to (6).

The total subcode placement of words is much higher, because of many, (but not all), multiple word findings, (generally disregarding most (2) letter word-spellings). Some (2)-letter **MUST be included,** because of the importance of what they spell. [Such as **BLOOD,** only a **2-letter word in Hebrew].**

Figure the odds of all the horizontal-residing subcodes, using only 90 letters (22 Words) and Vertical/Diagonal subcodes using 360 letters (90 Words), or even 540 letters, (135 Words), for other relevant subcode words. Additionally, they **MUST always,** be in **ELS-compliance, AND** 100% visible, in the projected Matrix.

Phenomena such as these examples **have occurred, many times,** in relation to other key codes, For further consideration, the minute pool of letters, in conjunction with most extremely small skip subcode words, (mostly **ELS** 1), can hardly be considered due to chance. **It is the rule ... not the exception!**

Consider this: Contiguously- formed vertical subcodes have exactly the same skip code (ELS), as the Key Code, while vertically-formed subcodes with ELS numbers of two (2), (3)or (4), have skip-codes of 2.... 3.... or .... 4 times **larger than** the 5771, (respectfully), of the Key Code.

Worth repeating: All of those vertically-formed subcodes have been **"SUMMONED"** to appear, by the Key Code, because, they have the same skip, as the **Key Code**....or a **multiple thereof ! ! !**

Further, every relevant, <u>horizontal contiguously-formed subcode, **ELS-compliant,**</u> is formed from a pool of only 90 letters of liturgy, (in a 90 Column x 40 Row Matrix), regardless of the amount of subcode words, being located in the same row.

If you chose to work in a different Matrix, containing a 70 Column x 40 Row Matrix, then, in that case, the pool of letters is thereby reduced to 70 scriptural-supplied letters, (prox 17 words), for all horizontal subcodes, regardless of the number of them. They still would have to be **ELS-compliant**, in a straight line, and be able to be seen in the observable T.V. screen, as an entire word, for all its letters...

About 70 % of the time, Contiguous words found, in the Horizontal mode, are complete words of scripture. In about 30 % of the time, letters forming pertinent subcodes, are from a combination of letters of words **cadged together,** from actual scripture. Are these words formed ....

       Accidentally.... or.... by..... Planned Engineering ? ?

Further, the complete subcode word, from the first letter, to the last letter, must be completely viewable, in the displayed, fixed matrix. Each and every row, and each and every letter/word of liturgy, is frozen in the 1st displayed matrix array,   <u>and</u> **never, ever moved, during investigation ! !**

EVERY LETTER,... OF EVERY LITURGICAL WORD,.... <u>IN THE HEBREW BIBLE</u>,...... IS IN EVERY COMPLETE SET OF MATRICES, ...<u>OF EVERY KEY CODE</u>..... THAT. ...WAS....IS ....EVER WILL BE..... FOUND..... <u>**FOR ETERNITY**</u>.......... !

Rev 1-5-05-

Letter To the Bible Code Digest, attached to the foregoing:

Sunday 1-05-05, I watched Bible Code 2 on T.V. It dealt with short coded words,… modernly dated,…. including 9-11-01. These people were considered to be among the foremost experts in the world.

It is my understanding that the Bible code digest's position is that short words are really of NO value, because they may appear in many long–worded documents … such as War & Peace, etc. , and the only true test would be many consecutive letter (words) relating to a specific sentence or paragraph. Such, apparently is not embraced, by the so-called experts, appearing on that show.

In this document, I am showing you, some small amount of research, that I have conducted over the past (7) years, which in my humble opinion, backs up the theory that small words (subcodes) could…and… do, present meaningful, relevant information, by NOT only their discovery, in any given matrix, but also because of the word placement and proximity to/abutting/touching/ crossing/ near/sharing letters with the key code… or …. each other.

My position is, that there is much to be said, about embracing both lines of research. It seems to me that the Bible Code Digest's recognition of…… both lines of approach,… would encourage additional support for your Digest, as well as of your members/readers, to participate in more research… especially those readers who do NOT speak/read Hebrew.

As you will see from the following, it isn't just a matter of finding one, two, or several relevant words, but actually an analysis of, where the words come from, where they are located, and how they were selected/got there.

Parts of this document might be a little technical, but in the main, you should be able to see the results of my research into the Hebrew Bible…as a coded (besides liturgical)…..document. Basically, this is not seeking sensationalism (a la Drosnin), but an honest attempt to ascertain the veracity… or not.. of the possible existence of a code being embedded in the Hebrew Bible, as discovered evidence dictates.

Since I have tested a number of J.C. matrices, 4 - 9 letter spellings ,(2) in the Hebrew mode and (2) in the English mode)… and… 38 - 8 letter spellings (16) in the Hebrew mode and (22) in the English mode). I can tell you, that many words discovered in 1 matrix, are NOT present, in another. However, what I consider "must haves", are always…. in every J.C. matrix, I have investigated, to date… but… NOT…necessarily with the same ELS's.. NOR .. in the same locations(s).

Much more professional investigation, is available, for the asking, from MY research, into possible Bible Coding present in the Hebrew Bible, if…. you are interested.

Thanx for reading…

Carmine Cifaldi
